

2014-15 Special Agreement Register: Severn Trent Water Ltd

Special Agreement Information

Potable Water

SVTPOT1 – SVTPOT374 (Concessionary Supplies)

These are all pre-1974 inherited agreements running in perpetuity. These totalled 303 in 2012-13. Total volume of water supplied to them that year was around 288MI; this generated revenue of just under £95,000.

Non-potable Water

SVTNONPOT1

This agreement is for the supply to customer' site of final effluent water from sewage treatment works supplied for use as process water. The fixed charge applied is for a supply of up to 150m³/day; any excess attracts a volumetric rate.

SVTNONPOT2

This agreement is for the supply of final effluent water from sewage treatment works for use as process water. A uniform volumetric rate is applied to all volumes supplied, inflated by tariff basket RPI each year. In addition, the customer pays for any reasonable costs incurred by company for conveying the effluent to its site

SVTNONPOT3

This agreement is for the supply of final effluent water from sewage treatment works for use as process water. A uniform volumetric rate is applied to all volumes supplied, subject to a minimum charge for 4,546m³. The volumetric rate is inflated by tariff basket RPI each year. In addition, the customer pays for any

Severn Trent Water Ltd

reasonable costs incurred by company for conveying the effluent to the customer's site, disinfecting it, and any associated maintenance costs.

Sewerage

SVTSEW1 – SVTSEW9

These are existing services identified as special agreements, and believed to pre-date privatisation.

Trade Effluent

SVTTE2

This agreement commenced in 1968 to run for 99 years. The charge is for the removal of solids, metals, cyanide and sulphate and is related to the cost of treatment at sewage treatment works.

SVTTE3

This customer is charged at a reduced R charge to reflect customer contribution to costs of connection.

SVTTE4

Agreed in 2000 to run for five years and amended in 2005. Variant of standard Mogden formula is applied to reflect unique discharge arrangements: no R charge because customer is not connected to public sewer; reduced V charge reflecting degree of treatment provided; B charge based on total COD rather than settled COD; and reduced S charge due to the nature of the discharge arrangements.

SVTTE5

One-off payment of £25,000 made in 1987 for the disposal in perpetuity of leachate from a landfill site.

Bulk Supply Information

Exports of Water

SVTBWE1 and SVTBWE2

These supplies are to Anglian Water and are charged at the standard volumetric rate.

SVTBWE3

This supply is to Anglian Water and is charged on the Intermediate user tariff rates.

SVTBWE4 to SVTBWE10

These supplies are to South Staffordshire Water and are charged on the average of the standard volumetric rates for Severn Trent Water and South Staffs area of South Staffordshire Water, less 20%.

SVTBWE11 and SVTBWE15

This supply is to Welsh Water and is charged on the Intermediate user tariff rates. The register presents data for the peak and off-peak rates separately.

SVTBWE12 to SVTBWE14

These three supplies are to Welsh Water and are charged at the standard volumetric rate.

SVTBWE16

This supply to Welsh Water is charged at a fixed volumetric rate of 22.70p/m³ plus the standard 80mm standing charges.

SVTBWE17

This supply is to Welsh Water and is charged on a reduced charge to reflect the particular costs of providing the supply.

2014-15 Special Agreement Register:
Severn Trent Water Ltd

SVTBWE18

This supply is to Thames Water and is charged on the Intermediate user tariff rates.

SVTBWE19

This supply is to Thames Water and is charged at standard rates.

SVTBWE20

This supply is to Yorkshire Water and is charged on a reduced charge to reflect the particular costs of providing the supply. Charges increase each year by the average increase in Severn Trent and Yorkshire Water charges.

SVTBWE21

This supply is to Dee Valley Water and is charged at the standard volumetric rate.

SVTBWE22

This supply is to SSE Water and is charged at the standard rate less access charge for volumes less than 10 MI/a. Demand above this threshold attracts the appropriate intermediate or large user tariff.

SVTBWE23

This supply is to Independent Water Networks and is charged at the standard rate less access charge for volumes less than 10 MI/a. Demand above this threshold attracts the appropriate intermediate or large user tariff.

Sewerage services supplied

There are no arrangements for the supply of bulk sewerage services to any appointee.
