Subject: Consultation - Highway Drainage

Mr Field,

(a) might I suggest that you withdraw this Consultation paper and re-issue it in plain English?. There are numerous grammatical errors and ambiguities in the current version.

(b) I assume from the OFWAT proposal that any appointee employing SUDS-type innovations receives no incentive, other than that they may not have to pay an existing appointee a fee?

This to me seems insufficient incentive to install SUDS-type innovations. Such appointees should receive greater benefit, as it reduces the demand for the sewers.
