
Retail market transition arrangements – a consultation

To Whom it May Concern:

Welsh Water would like simply to confirm that we are content with the arrangements for transition to the new regulatory and legal framework for non-household retail competition, as set it in the consultation referenced above.

Do you agree with our proposal to mandate that there can be no customer switches under the existing Customer Transfer Protocol during the last [x] days before market opening?

Yes

Q2: Do you agree with our proposal to use a Schedule 11 transition scheme to revoke all WSLs (including CSLs – subject to alternative provisions being put in place)?

Yes

Q3: Should the proposed Schedule 11 transition scheme make provision for what should happen to any existing wholesale contracts?

We would welcome provisions in the proposed Schedule 11 transition scheme to cover existing wholesale contracts

Q4: Are there any other elements of the current arrangements that should be included in the proposed Schedule 11 transition scheme (either to revoke or terminate them, or to make provision for them to continue in some form, if that is consistent with the provisions of the Act)?

No, not as far as we are aware.

Kind regards,

Daniel Davies
