

Thames Water response by email:

Hello Emma,

The following is our feedback.

Do you have any comments or suggestions about the draft application form?

It is clear and covers the points required well.

Does the application guidance provide sufficient detail for applicants to apply for a water supply and/or sewerage licence with retail, restricted retail, wholesale and/or supplementary authorisations?

We believe so.

Have you any suggestions for elements of guidance that are missing, or alternatively are not required, in the draft application guidance?

No.

Have you any other comments in response to this consultation?

We believe that the modifications to the form and guidance reflect the consultation conclusions, are clearly written, and are an improvement on the previous version.

Best regards, Hugh
