Part I: Disputes

Introduction: Disputes are categorised into Trading Disputes (relating to Data Items), MO Disputes and Non-Trading Disputes (which are all other disputes).

Non-Trading Disputes: Section 17 provides a mechanism for resolving Non-Trading Disputes, leading ultimately to arbitration under Section 19.

Trading Disputes: Section 18 provides an alternative mechanism for resolving Trading Disputes. A Trading Dispute only concerns an error in a Data Item. Trading Disputes must be raised, dealt with and decided in accordance with Section 18. Section 18 refers to the Market Arrangements Code, Schedule 9 of which sets out the Trading Disputes resolution mechanism via the Trading Disputes Committee.

If not resolved to the satisfaction of the Disputing Parties, Trading Disputes may then be referred to arbitration under Section 19.

Arbitration: Section 19 provides for arbitration, which can be used as the ultimate resolution for both Trading Disputes and Non-Trading Disputes.

MO Disputes: Sections 17, 18 and 19 do not apply to any dispute by any Trading Party with the Market Operator. Any such disputes should be resolved in accordance with Section 5 of the Market Terms and Section 18 of the Market Arrangements Code.

Timescales: The timescales set out in Sections 17 and 18 are expressed as maximum timescales. For the avoidance of doubt, the Disputing Parties are not prevented from agreeing shorter timescales in circumstances where any Dispute requires urgent resolution.

17. Non-Trading Disputes

17.1 Save to the extent that any dispute, application, determination, arbitration, appeal or equivalent right of referral to a third party is expressly provided for in:

17.1.1 the Water Industry Act 1991 or the Water Act 2014; or

17.1.2 any Licence or any Appointment; or

17.1.3 the rights, powers, duties, functions or obligations of the Authority or the Secretary of State under the Water Industry Act 1991, the Water Act 2014, any other Law, any Appointment, Licence or otherwise howsoever,

If such enquiry is not resolved pursuant to such step, process or other procedure within the timescale set out (or, if no timescale is set out, within ten (10) Business Days) the following provisions of this Section 17, from Section 17.3 onwards, and Section 19 shall apply.

Schedule 1B of the Business Terms:

Appendix 2 - Sampling, Service Requirements

1. Sampling General

- 1.1 The Contracting Wholesaler will provide the Contracting Retailer with a Trade Effluent Sampling Plan including sample point locations for each Discharge Point which are subject to the provision of services by the Contracting Retailer.
- 1.2 Each Trade Effluent Sampling Plan will cover a period running from 1 April in a calendar year (or, if different, in the case of the first Trade Effluent Sampling Plan, the commencement date for TE Service A or TE Service B) until 31 March in the following calendar year.
- 1.3 The Trade Effluent Sampling Plan will include the sampling frequency, i.e. the number of samples to be taken each year, and the name and contact details of the Contracting Wholesaler's Trade Effluent Quality Adviser responsible for monitoring the premises. The Contracting Wholesaler may also provide additional information regarding the sampling arrangements at each site e.g. whether an automatic sampler has been provided by the Non-Household Customer, if the Contracting Retailer is to undertake 24-hour composite sampling utilising a portable automatic sampler, or if there are any seasonal variations in sampling requirements.
- 1.4 Within ten (10) Business Days of receiving the Trade Effluent Sampling Plan and additional information from the Contracting Wholesaler, or any subsequent annual update of such Trade Effluent Sampling Plan, the Contracting Retailer will produce and submit to the Contracting Wholesaler a schedule of Sampling Visits for the Discharge Point. The schedule will provide the anticipated dates that the samples will be taken. Samples should be taken from a Discharge Point at regular intervals over the year (subject to any seasonal variations in sampling requirements notified by the Contracting Wholesaler) and, so far as practicable, should not be taken on the same day of the week or at the same time of day. The Contracting Retailer must obtain the Contracting Wholesaler's approval of the sampling schedule in advance of commencing sampling and must inform the Contracting Wholesaler of any subsequent changes it intends making to the schedule. The Contracting Wholesaler may accompany the Contracting Retailer at any Sampling Visit.
- 1.5 The Contracting Wholesaler may change the Trade Effluent Sampling Plan at any time, notifying the Contracting Retailer of such changes in which case the Contracting Retailer will produce and submit to the Contracting Wholesaler a revised schedule of Sampling Visits within twenty-eight (28) days of the Contracting Wholesaler's notification. The Contracting Retailer must obtain the Contracting Wholesaler's approval of any revised schedule in advance of implementing its terms. As a matter of course, the Contracting Wholesaler will provide the Contracting Retailer with annual updates to the Trade Effluent Sampling Plan and associated information as appropriate.
- 1.6 The Contracting Retailer shall use its best endeavours to adhere to the intended dates of the Sampling Visits set out in its sampling schedule. In any case, samples must be taken not earlier than two (2) Business Days before, and not later than two (2) Business Days after, the scheduled date. If for any reason the Contracting

Retailer is unable to take the sample within that period, it must contact the Contracting Wholesaler and agree an alternative date for the Sampling Visit. Such alternative date must be within ten (10) days after the scheduled date. The Contracting Retailer must also inform the Contracting Wholesaler of the failure to take a sample through the submission of an observation report to the Contracting Wholesaler as set out in paragraph 3 below.

- 1.7 If, during the course of a Sampling Visit to a Non-Household Customer's premises or through any other contact with the Non-Household Customer, the Contracting Retailer becomes aware of any change to the company name or the company contact details, the Contracting Retailer shall notify the Contracting Wholesaler within five (5) days and the Contracting Wholesaler shall amend the Trade Effluent Sampling Plan as appropriate.

2. **Transportation**

Samples must be taken from the designated Discharge Points notified by the Contracting Wholesaler and transported to the designated analytical laboratory according to the accredited procedures previously supplied to the Contracting Wholesaler. This normally means that samples are submitted to the analytical laboratory on the same day that they are taken and in any case within 24 hours of the Sampling Visit. The Contracting Retailer must ensure that samples transported to the laboratory are stored in the appropriate conditions. This generally means that the samples must be stored between 2°C and 8°C in transit.

3. **Sampling observation reports**

In the course of each Sampling Visit, the Contracting Retailer will carry out site-specific observations in accordance with its accredited procedures or where specifically required by the Contracting Wholesaler under the Trade Effluent Sampling Plan, including the site-specific observations listed in the Trade Effluent Sampling Code of Practice. The Contracting Retailer must record any site-specific observations which it carries out under this paragraph, and, within five (5) Business Days of the date of each Sampling Visit, it must submit to the Contracting Wholesaler a Sampling Observation Report containing details thereof. This paragraph 3 is without prejudice to the provisions of the next following paragraph.

4. **Immediate contact**

- 4.1 If in the course of a Sampling Visit the Contracting Retailer observes any discharge to sewer, event, equipment defect or act or omission by the Non-Household Customer which in its opinion constitutes:
 - 4.1.1 a breach or an anticipated or threatened breach of a Trade Effluent Consent; and/or
 - 4.1.2 an event which could have a significant detrimental impact on the Sewerage System or the Contracting Wholesaler's staff,
 - 4.1.3 it must immediately contact the Contracting Wholesaler's Trade Effluent Quality Adviser associated with that Discharge Point using the telephone contact details previously provided. It must then submit its Sampling

Observation Report to the Contracting Wholesaler's Trade Effluent Quality Adviser within 24 hours of that initial contact.

- 4.2 In considering and determining whether it requires to contact the Contracting Wholesaler under this paragraph, the Contracting Retailer shall use that degree of skill, care, diligence, prudence and foresight which would reasonably and ordinarily be expected from a skilled and experienced person engaged in similar sampling work.
