31 March 2017

Dear Sir or Madam

**Further consultation on the 2010-2015 final reconciliation for the change protocol and overlap mechanisms**

Thank you for the opportunity to comment on the revised proposals for the final reconciliation for the change protocol and overlap mechanisms.

We support the principle of not changing the logging up or down where there is no material change in outputs compared to the assumption in the 2014 Final Determination.

We note that the consultation does not include logging up expenditure relating to Counters Creek, pending a review of the evidence regarding the outputs that were delivered. We provided evidence on this on 13 March 2017, which we hope will assist you in reaching the final reconciliation position on the amount to be logged up for Counters Creek.

Please do not hesitate to get in touch if it would be helpful to discuss any issues related to the 2010-2015 final reconciliation, including any points from our response to the initial consultation, for example the TTT anomaly, or to Counters Creek outputs delivered.

We look forward to receiving the updated view of the reconciliation in summer 2017.

Yours faithfully

A handwritten signature in blue ink, appearing to read "Colm Gibson".
