Introduction

Ofwat is the economic regulator of water and waste water companies in England and Wales. One of the ways we deliver our duties is to set the **price, investment and performance expectations** that customers receive. Our role in the setting of price limits is to protect consumers' interests. Most customers cannot choose their supplier, so one of the ways we do this is to decide the price and service package ('price controls') that monopoly water and waste water and water only companies must deliver.

The decisions we will make as a result of the next price review ('PR19') will affect bills from 2020. These price controls affect the bills that customers pay and the water and waste water services consumers receive, and so are of key strategic importance.

We will consult on the way we set price controls (our 'methodology') in July 2017 and publish our final methodology in December 2017, before setting final price limits in December 2019. As part of the PR19 planning process, we are considering what external support we will need to deliver our key objectives.

In April, we issued a market sounding notice inviting organisation to engage with us on a Delivery Partner arrangement to support our 2019 price review.

A Delivery Partner in the context of a price review is a strategic partner that will work collaboratively with Ofwat to deliver PR19, providing advice, analysis, assurance, knowledge sharing and learning. Therefore, at a high level, any Delivery Partner would have to be able to demonstrate:

- a working knowledge of price reviews in the water sector and/or utilities sector;
- ability to work according to Ofwat's values;
- ability to apply our governance framework principles in terms of transparency and accountability;
- flexible management of resources and ability to deal with uncertainties and potential changes;
- support Ofwat's learning environment by sharing knowledge and delivering learning amongst Ofwat's people.

A number of organisations have expressed an interest in supporting a Delivery Partner and to sharing their interest with other parties to facilitate networking and communication within the supply chain.

From time to time, we may update the directory with new interested parties. If you would like to be included in the directory, please email your request to: PR19DeliveryPartner@ofwat.gsi.gov.uk.

<p>Aiimi Limited</p>	<p>Aiimi delivers strategic, transformational, operational and technical consulting services designed to help our clients understand and get value from their information. <p>MCG Professionals Limited</p>	<p>Established in 2009, MCG Professionals was founded by Robin McGrenary. From the outset MCG has been built on a concept of value for money Project, Program and PMO consultancy and professional services.</p> <p>MCG's primary objective has remained constant from the beginning: help our clients make lasting and substantial improvements to their performance, business and projects. As a trusted external adviser, we help clients on a range of issues, from transforming performance and implementing organizational change to developing innovative strategies.</p> <p>MCG brings top consultancy experience mixed with the personality, approach and "value for money" of a focused team. The key to success is working with clients with what they really need – professionalism and results. As a disciplined, niche firm, we concentrate on building lean, long-term relationships with our clients and we always 'under-stay our welcome' on individual assignments. We treat every single customer as our only customer.</p>

PA Consulting Group	PA Consulting is a consulting, technology and innovation firm with a long history in supporting the water sector. Our experience stems from our background in supporting and driving major regulatory change across the sector: most recently as Ofwat's delivery partner for the successful opening of the world's largest water and wastewater retail market. We supported Ofwat's PR14 programme with the implementation of an outcomes based assessment of company business plans and took a number of roles in the Portfolio team.
Liz Parminter Member of PA's Management Group Liz.Parminter@paconsulting.com 123 Buckingham Palace Rd, London, SW1W 9SR +44 207 333 5622 http://www.paconsulting.com/	We bring unique sector insight combined with our market-leading capability and experience to understand the issues the sector faces. A number of our consultants come from water sector backgrounds across the value chain and have been pivotal in the development of price review policy and methodology, authoring and managing the submission of business plans, conducting customer engagement strategies and designing, implementing, managing and operating assets.

<p>Program Planning Professionals Ltd (t/a Pcubed)</p>	<p>Pcubed is a global management consultancy specialising in transformational business change and project, programme and portfolio management. We have over 1200 consultants globally and c. 200 in the UK.</p>

<p>Practicus Limited</p>	<p>Practicus is a non-traditional consultancy that is recognised for the effective implementation of client outcomes through our core capability in project delivery.</p> <p>Our services target the support clients need with business, operations and technology change – from helping to formulate what that change looks like through to delivering it sustainably.</p> <p>We have partnered with regulated businesses for over 13 years. Our sector specialisms include Energy and Utilities, both retail and supply, Regulatory bodies, Financial Services as well as the Public Sector.</p> <p>Every client's requirement is different, so we don't work to a pre-defined solution, or sell an inflexible methodology. Instead, we listen until we understand precisely what our clients' need is and work with them to plan, structure and deliver the transformation they require.</p> <p>For some change programmes, this will mean supplementing clients' own teams with additional expertise and capability. For other projects, it will mean taking complete ownership for delivering the outcome on the client's behalf.</p> <p>However we're asked to work, we understand the pressures our clients are under, and we take pride in working in a straightforward and honest way to help achieve business change that surpasses expectations.</p>
<p>Andrew Blackie Business Development Director tenders@practicus.com Practicus Ltd. 50 St Mary Axe London WC3A 8FR 0207 3748886 www.practicus.com</p>	

<p>Pricewaterhouse Coopers LLP</p>	<p>PwC provides professional services to clients, managed through four practices: consulting, assurance, tax and deals. Our UK business has over 19,000 partners and staff and provides professional services to around 25,000 clients. Each practice has people with deep water and utilities experience, and we can draw on our firm-wide skills in a delivery partner role. PwC's 100-strong Economics and Policy consulting practice specialises in economic and financial advice in the fields of competition, regulation, strategy, and market analysis. We apply advanced analysis and thinking to help clients solve complicated problems, gain strategic insight into economic, regulatory and commercial issues across sectors. Our data analytics team has a detailed understanding of price control modelling, having prepared Ofwat's PR14 financial models. Our regulatory accounting experts have extensive experience of the Ofwat regulatory accounting rules. Our capital projects team has engineering and capital projects costing expertise that can be deployed to assess companies' business plans. Our water and utilities consulting practice has deep experience of transforming water and wastewater wholesale and retail businesses, giving us a practical understanding of the industry. Every client's issues are unique. Hence, we focus on working flexibly in partnership with our clients to deliver the best outcome.</p>

<p>Regulatory Economics Limited</p>	<p>Regulatory Economics Limited is a small, specialist advisory firm specialising in matters relating to economic regulation and competition economics. Our experience in the water sector includes: assessment of the prospects for competition; the development of pricing principles for water charging; access pricing disputes; and various other aspects relating to price controls and the wider economic regulatory framework, including water resources management and the assessment of economic impacts associated with shortfalls of supply. Our Principal is a member of the Global Water Partnership's Expert Group on the Benefits of Action/ Cost of Inaction for Drought Preparedness; the International Water Association's Working Group on public policy and regulation for resilience; and the UK Competition and Market Authority's academic panel. He is also currently lead economist on two inter-disciplinary projects jointly funded by the UK Economic and Social Research Council and Natural Environmental Research Council focussed on managing and responding to the risk and uncertainties of water scarcity.</p> <p>Outside of the water sector, we have provided advice and support to regulators and government bodies in a number of developed and emerging economies in relation across a range of regulated activities (energy, communications, transport, financial services).</p>
<p>Chris Decker Principal enquiries@regulatoryeconomics.co.uk 18 Southmoor Road, Oxford, OX2 6RD</p>	

SLG Economics Ltd	SLG Economics is an economic consultancy set up by Stephen Gibson in 2011. It provides specialist regulatory and competition economics and policy advice to regulators, regulated companies and government.
Stephen Gibson Director Stephen@SLG-Economics.co.uk 4 Chessington Avenue, London, N3 3DP 078999 34960 www.SLG-Economics.co.uk	Projects have included interim roles, incentive design, periodic review support, impact assessments, advice on the cost of capital and RAB, drafting regulatory consultations and responses to regulatory consultations, expert witness statements, independent quality assurance of regulatory policies, market studies, advice on pricing trends, advice on costing methodologies and competition assessments. This has covered the airports, rail, energy, postal, energy, telecoms, water, ports, health and food sectors.

<p>Strategic Management Consultants</p>	<p>SMC consultants have all gained their technical expertise from practical application of disciplines in engineering, finance, business planning, procurement and general management in water companies and in non-utility companies. We claim sound qualifications enhanced by our experience of identifying opportunities and finding solutions to problems in a live environment.</p> <p>Our core team has worked with Ofwat and other regulators in a variety of roles. In our role as Ofwat Reporter we provided assurance for leading water and sewerage companies from 1998 to 2011. Since 2011 we have been engaged directly by companies. A large number of our projects have been to examine data, systems and procedures used by large companies and to report on their validity and whether they are appropriate. Such work always relies on establishing a good working relationship with members of staff of the companies, ensuring a thorough understanding of their explanations and making clear any issues we raise.</p>

<p>Waterwise</p>	<p>Waterwise is an independent not-for-profit organisation, and is the leading authority on water efficiency in the UK. Our vision is that water will be used wisely, every day, everywhere. We work with water companies, governments, regulators, product manufacturers, academia, other environmental NGOs and a wide range of other stakeholders to drive ambitious and innovative water efficiency policy, regulation and delivery, drawing on evidence. We receive funding from some of these stakeholders which supports our thought leadership and influencing work, but we have an independent Board. We also work with partners, including consultants, on specific projects to drive water efficiency knowledge and delivery.</p> <p>We work with supporters and stakeholders, with an independent voice, to set a forward-looking agenda for water efficiency by being innovative, by working in partnership, by inspiring and supporting new ideas, models, concepts and processes, and by facilitating the work of others to progress the delivery of water efficiency. We use evidence to underpin all of our work.</p>
