Introduction from Rachel Fletcher, Chief Executive

Water is not a dry issue.

The water sector in England and Wales has come a long way in the past 27 years. At privatisation, polluted beaches and rivers and neglected infrastructure meant we were seen as the ‘dirty man of Europe’.

The regulation of this sector was entrusted to the Water Services Regulation Authority (Ofwat) which has maintained a steady hand in driving and incentivising the sector to deliver and to improve. Over the period since privatisation, the water companies have invested more than £140 billion in maintaining and improving services for consumers and the environment. Today, for example, the amount of water lost through leaks is down by about a third since the mid-1990s. In addition, salmon have returned to the River Mersey, once considered one of the most polluted in Europe. All of this has been delivered efficiently too – a litre of tap water, supplied and taken away, costs less than half a penny.

But the world is changing. The water sector faces new problems and very different challenges. In the future, climate change may mean we get more droughts and more floods, making it harder to maintain resilient supplies. Our population is growing, putting more pressure on the water we use. Lifestyle changes have increased our appetite for water in our homes, our work places and our places of leisure. The changing social and economic landscape also means we need to reconsider how business operates and how customers are able to afford their water and sewerage bills.

Ofwat needs to be at forefront of determining and implementing a regulatory system that will protect customers’ interests, drive efficiencies and innovation, enable efficient companies to finance their functions and to ensure that the ‘promises of privatisation’ are delivered. We all need to have trust and confidence in the water and wastewater services we receive.

To do this, Ofwat needs to be at the very top of its game. Thank you for your interest in joining Ofwat at what is a very exciting time for us. We look forward to receiving your application.

Rachel Fletcher
Ofwat Chief Executive

About Ofwat and the role

Ofwat (the Water Services Regulation Authority) is the economic regulator of the water and wastewater sector in England and Wales. Our role is to help it build trust and confidence with customers, the environment and wider society. Our strategic priorities include:

- Working with the sector to improve the customer experience in particular by improving resilience, delivering a step change in customer service, maintaining affordability and driving efficiency.
- Improving information and transparency in the sector to hold companies to account.
- Supporting the development and investability of markets, to enable the sector to deliver more for less.
- Securing stakeholder engagement and support for change.
- Ensuring Ofwat has the skills, experience, systems, processes and culture to deliver the strategy.

Our focus as a regulator is on regulating in a pro-market way which means establishing an effective framework that improves information (e.g. quality and visibility); improves buyers' and sellers' ability to transact (e.g. reducing 'transaction costs'); and/or by improving incentives on buyers and sellers to transact efficiently. In addition, we will look to make targeted interventions only, rather than taking a prescriptive, one-size-fits-all approach.
