

Tresco Estate is Scilly's largest business and individual water user, we are a diverse and sustainable business ranging from land and historic gardens management to an over 600 bedspace visitor accommodation provider with associated restaurants, retail and spa facilities.

We welcome the transfer of water and sewerage responsibilities to South West Water. The transfer to a much larger organisation with a wider range of water and sewage specific skills will bring much needed skills and resilience to the Islands and support the capital investment required to transform our current potable and waste water systems, especially the aging sewage system on St Mary's.
