Trust in water

PR19 draft determinations: South West Water – Outcomes performance commitment appendix

0 f w a t

PR19 draft determinations: South West Water - Outcomes performance commitment appendix

This appendix sets out in detail the performance commitments and outcome delivery incentives we are putting in place for South West Water for the period 2020-2025.

This is a technical document to clearly specify the performance commitments and outcome delivery incentives. This document is not intended to substitute for the information that South West Water should provide customers on its outcomes and performance commitments.

The appendix sets out each of the company's performance commitments and associated outcome delivery incentives, firstly for common and then for bespoke performance commitments and their associated outcome delivery incentives.

The appendix provides the following information on each performance commitment:

- the name and unique identifier of the performance commitment;
- a summary of the purpose and benefits of the performance commitment. The definitions and other terms set out in the performance commitment should be considered to be authoritative in determining the company's commitments and incentives under the performance commitment;
- the detailed definition of the performance commitment. Where these refer to, and incorporate, linked information as part of the description of any aspect of these definitions (for example documents on the Ofwat or other website, or an attachment to the performance commitment), the linked information should be considered to be authoritative in interpreting the definitions of the performance commitment, unless otherwise stated. It is the company's responsibility to report accurate and complete information and it must have adequate processes in place to do this. Any direction on reporting and assurance is specific to the commitment and in addition to the company meeting other obligations;
- the form and type of the outcome delivery incentive;
- the performance commitment levels and targets;
- the limits on outperformance and underperformance payments (caps and collars) and neutral zones (deadbands), if applicable;
- the incentive rates, if applicable;
- the allocation of the performance commitment to the company's applicable price controls; and
- any other additional details on the measure, as required.

In the PR19 Final Methodology (p56) we state that:

- Companies should commit to keeping the definitions of their performance commitments unchanged during 2020-25 and to follow our procedures for any changes.
- Companies should commit that their ODI payments will only relate to real performance changes and not definitional, methodological or data changes in the performance commitment.

We will be mindful of these points when we are assessing companies' performance against their commitments and ODIs during the 2020-25 period.

We will be considering the procedures for making any changes during the 2020-25 period in due course, taking Information Notice IN16/07 (which explains our current policy in relation to requests for changes to outcomes, performance commitments and outcome delivery incentives) as the starting point.

An accompanying 'South West Water - Delivering outcomes for customers actions and interventions' document sets out our response for each action that we specified for the company at the IAP that relates to performance commitments and outcome delivery incentives. This includes, a summary of the company's response to our action, our draft determination of whether a further intervention is required or not, and the rationale for and nature of our draft determination. It also states interventions, if any, that we are making in the draft determination that are not related to specific IAP actions. The detail of the performance commitments and outcome delivery incentives set out in this appendix reflect these interventions.

1.1 Common performance commitments

This section sets out the detail of each of the common performance commitments and outcome delivery incentives we are putting in place for the company for the period 2020-2025, with the exceptions of C-Mex and D-Mex.

We have not included here the detail of the proposed C-Mex and D-Mex common performance commitments for the company. As explained in our C-Mex and D-Mex policy decision documents published on 8th March, we will publish our decision on final C-Mex and D-Mex incentive design for 2020-2025 as part of the final determinations in December, at which point we will also finalise the detail of these performance commitments and outcome delivery incentives for the company in the same form as the other performance commitments.

A number of companies propose enhanced ODIs for certain common PCs, including Fast Track companies. In the PR19 methodology (Appendix 2, p.85) we state: “Companies proposing enhanced outperformance and underperformance payments should explain in their business plans how they will share the knowledge behind their success with companies across the sector by the end of the 2020-25 price review period or soon after. Receiving the enhanced outperformance payments will depend on whether the company has a credible plan for sharing its approach with the sector.” This is an important aspect of the framework for enhanced ODIs and we will set out, as part of the final determinations, how we will hold companies to account on this (including, for example, the specification of knowledge-sharing plans in the performance commitments and how implementation of these plans will be reflected in subsequent determinations of enhanced payments).

In relation to common performance commitments with financial ODIs, companies have put forward a variety of proposed allocations across price controls. We accept that there may be good reasons for these differences and at this stage we have accepted the proposed allocations. We will consider further whether this is an appropriate approach for slow track and significant scrutiny draft determinations in July and for final determinations for all companies in December.

We note that a number of the common performance commitments incorporate linked information relating to the detailed interpretation of definitions, measurement guidelines or reporting guidelines. These include links to the PR19 Outcomes definitions page on the Ofwat website (and more detailed documents embedded on that web page) and, in some cases, to documents on the Environment Agency and Drinking Water Inspectorate (DWI) websites. Some of the definitions and further guidance contained therein have been the subject of extensive collaborative working between the industry and regulators. Some are still subject to comments from

stakeholders and potential improvements (for example through the lessons learned from the experience of “shadow year” reporting). Lessons may continue to be learned and further improvements made as we move from shadow to actual reporting of the performance commitments. We are open to views from stakeholders as to whether we should provide all the detail of every aspect of the specification of the performance commitment within the templates set out here, or continue to retain links to information on the Ofwat and other external websites. This will inform our consideration of whether there should be any changes to our approach to the specification and documentation of the common performance commitments in the slow track and significant scrutiny draft determinations in July, at which point we will invite further views if necessary. The final form of the performance commitments for all companies will be set out in the final determinations in December.

1.1.1 Water quality compliance (CRI)

Purpose: The Compliance Risk Index (CRI) measures the risk arising from treated water compliance failures and incentivises companies to minimise that risk.

Benefits: Performance against this PC gives customers a confidence that water is clean and safe to drink and also highlights the company’s ability to conform to its statutory obligations.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC A1
Detailed definition of performance measure:	The definition for this PC is set by the Drinking Water Inspectorate (DWI) in collaboration with the industry: This is published as <i>DWI Compliance Risk Index (CRI)</i> , August 2018 at http://www.dwi.gov.uk/stakeholders/price-review-process/CRI_Def.pdf
Additional detail on measurement units:	A CRI score is calculated for every individual compliance failure at water supply zones, supply points and treatment works, and service reservoirs. The annual CRI for a company, for any given calendar year, is the sum of the individual CRI scores for every compliance failure reported during the year (see the DWI Compliance Risk Index for further detail on the full calculations).
Specific exclusions:	There are no specific exclusions, however, for some special rules on calculation of risk score refer to the definition. This performance commitment does not apply to the Isles of Scilly until 2025
Reporting and assurance:	No specific requirements.
Measurement unit and decimal places	Numerical CRI score, reported to two decimal places.
Measurement timing	Calendar year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% water network plus

Unique Reference	PR19SWB_PC A1
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020, whereas 2024-25 assessment will be based on the calendar year 2024.
Any other relevant information	DWI publishes provisional CRI scores in April each year for the previous calendar year. Final scores are published in July of each year in their annual water quality reports.
Links to relevant external documents	http://www.dwi.gov.uk/about/annual-report/index.htm

Performance commitment levels

	Unit	Company forecast	Committed performance level

Outperformance payment - enhanced	NA

1.1.2 Water supply interruptions

Purpose: This PC is designed to incentivise companies to minimise the number and duration of supply interruptions.

Benefits: Reducing the frequency and duration of interruption events improves the reliability of supply and reduces negative social impacts on customers.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC A2
Detailed definition of performance measure	<p>Reducing interruptions to water supply is defined in the reporting guidance for PR19 – Supply Interruptions, published on the 27th March 2018: https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Reporting-guidance-supply-interruptions.pdf</p> <p>Is calculated as the average number of minutes lost per customer for the whole customer base for interruptions that lasted three hours or more</p>
Additional detail on measurement units	<p>Output should be presented as average minutes lost. Calculation of performance is carried out using the following equation:</p> $\frac{((\text{Properties with interrupted supply} \geq 180 \text{ mins}) \times \text{Full duration of interruption})}{\text{Total number of properties supplied (year end)}} = \text{average number of minutes lost per customer}$ <p>Properties supplied: properties shall include billed mains pressure fed household and non-household properties connected to the company's water supply network.</p> <p>Supply interruption: is defined as when the supply of water to a property is at a pressure of three metres or less (adjusted for any difference in ground or property level).</p> <p>Duration of interruption: is defined as the length of time for which properties are without a continuous supply of water at a pressure over three metres. The duration shall only be considered in the calculation of the metric where the duration is three hours or greater.</p>
Specific exclusions:	None
Reporting and assurance:	No specific requirements.
Measurement unit and decimal places	Hours:minutes:seconds (HH:MM:SS) per property per year, reported to zero decimal places.
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments

Unique Reference	PR19SWB_PC A2
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% water network plus
Frequency of reporting	Annually
Any other relevant information	ODI rate applies on a per minute basis.
Links to relevant external documents	NA

1.1.3 Leakage

Purpose: This PC is designed to incentivise companies to reduce leakage.

Benefits: The benefits of reduced leakage are improved water resources supply/demand balance and increased water supply network resilience.

The company has committed to reduce average annual leakage by 15.8% from 2019-20 to 2024-25. This is a different figure in the table below as the performance commitment is measured on a three-year average to smooth annual variations due to weather.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC C2
Detailed definition of performance measure	<p>The total level of leakage is defined in the Final reporting guidance for PR19 – Leakage, published on the 27th March 2018: https://www.ofwat.gov.uk/publication/reporting-guidance-leakage/</p> <p>It is calculated as a three-year average and reported in absolute values expressed in megalitres per day (Ml/d) and as percentage reduction from baseline. The definitive service levels are those expressed in the percentage reduction from baseline.</p>
Additional detail on measurement units	<p>Total leakage is defined as the sum of distribution system leakage, including service reservoir losses and trunk main leakage plus customer supply pipe leakage.</p> <p>Baseline total leakage is calculated as a three-year average of annual values for 2017-18, 2018-19 and 2019-20 and expressed in megalitres per day (Ml/d).</p> <p>Three-year average values are calculated from annual average values for the reporting year and two preceding years and expressed in megalitres per day (Ml/d).</p>
Specific exclusions:	As defined in the reporting guidance.
Reporting and assurance:	This measure is reported in absolute terms and also the percentage change from 2019-20 baseline.
Measurement unit and decimal places	<p>Percentage reduction from 2019-20 baseline, reported to one decimal place.</p> <p>The volumetric levels resulting from the application of the percentage reduction in megalitres per day (Ml/d) reported to one decimal place.</p>
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments

Unique Reference	PR19SWB_PC C2
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% water network plus
Frequency of reporting	Annually
Any other relevant information	<p>Performance commitment levels are set as both percentage reduction from 2019-20 forecast baseline and absolute values expressed in megalitres per day (Ml/d).</p> <p>Performance commitment levels expressed as percentage reduction are to be re-applied to 2019-20 actual baseline following the final data being available to recalculate the performance commitment levels re-presented in megalitres per day (Ml/d).</p> <p>Incentive payments relate to performance changes expressed in megalitres per day (Ml/d).</p>
Links to relevant external documents	None

1.1.4 Per capita consumption

Purpose: This PC is designed to incentivise companies to help customers reduce their consumption.

Benefits: The benefit of reduced per capita consumption (PCC) is to improve long term water resources supply/demand balance.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC C3
Detailed definition of performance measure	Per capita consumption is defined in the Final reporting guidance for PR19 – Per Capita Consumption, published on the 27th March 2018: https://www.ofwat.gov.uk/publication/reporting-guidance-per-capita-consumption/ It is reported as a three-year average and reported in absolute values expressed in litres/person/day (l/p/d) and as percentage reduction from baseline. The definitive service levels are those expressed in the percentage reduction from baseline.
Additional detail on measurement units	Per capita consumption is defined as the sum of measured household consumption and unmeasured household consumption divided by the total household population. Three-year average values are calculated from annual average values for the reporting year and two preceding years and expressed in litres/person/day (l/p/d).
Specific exclusions:	As defined in the reporting guidance.
Reporting and assurance:	This measure is reported in absolute terms and percentage reduction from 2019-20 baseline.
Measurement unit and decimal places	Percentage reduction from 2019-20 baseline, reported to one decimal place. The volumetric levels resulting from the application of the percentage reduction in litres/person/day (l/p/d) reported to one decimal place.

1.1.5 Mains repairs

Purpose: This PC is designed to incentivise that the asset health of the infrastructure and below-ground water mains network is being appropriately maintained and improved and that the company is committed to its asset stewardship responsibility.

Benefits: This PC helps to ensure that the overall asset health of the water mains network is maintained and improved for the benefit of current and future generations.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC A3
Detailed definition of performance measure	Mains repairs is defined in the reporting guidance for PR19 – Mains Repairs per 1000km, published on the 27 th March 2018. https://www.ofwat.gov.uk/publication/reporting-guidance-mains-repairs-per-1000km/ It is reported as the number of mains repairs per thousand kilometres of the entire water main network (excluding communication and supply pipes).
Additional detail on measurement units	Mains repairs – This includes all physical repair work to mains from which water is lost. Mains length – This is the length of all pipes conveying treated water around the distribution point but not including communication pipes or supply pipes.
Specific exclusions	As defined in the reporting guidance.
Reporting and assurance	The company is also required to report mains repaired pro-actively and reactively separately.
Measurement unit and decimal places	Number of repairs per 1000km of mains, reported to one decimal place.
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments

1.1.6 Unplanned outage

Purpose: This PC is designed to incentivise that the asset health of the non-infrastructure or above-ground water assets is being appropriately maintained and improved and that the company is committed to its asset stewardship responsibility.

Benefits: This PC helps to ensure that the overall asset health of the above-ground water assets is maintained and improved for the benefit of current and future generations.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC A4
Detailed definition of performance measure	<p>Unplanned outage is defined in the reporting guidance for PR19 – Unplanned Outage, published on the 27th March 2018. https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Reporting-guidance-unplanned-outage.pdf</p> <p>This measure is reported as the temporary loss of peak week production capacity (PWPC) in the reporting year weighted by the duration of the loss (in days). Unplanned outage for each water production site is calculated separately and then summed over the reporting year to give a total actual unplanned outage for the water resource zone.</p> <p>The company water resource zone weighted outage can then be summed (Ml/d) and normalised based on overall company peak week production capacity to be reported as a percentage.</p>
Additional detail on measurement units	<p>Above-ground assets include: source abstraction assets, raw water transport assets, raw water storage assets, water treatment assets, treated water storage assets, treated water distribution assets before distribution input meters.</p> <p>PWPC: This is equivalent to the maximum volume of water which can be put into supply and sustained over a period of one week measured in Ml/d.</p> <p>Unplanned outage or asset failure: - The failure or deterioration of any asset which impacts on the ability to produce the peak week production capacity should be recorded as an unplanned outage.</p> <p>Planned outages: Where assets are taken out of supply or made unavailable for supply to enable planned maintenance or capital works to be completed then these should be recorded as planned outages. Where planned work results from an asset failure any resulting outage should also be recorded as unplanned.</p> <p>Duration: Only outage events which exceed 24 hours in duration should be included in this measure</p>
Specific exclusions:	As defined in the reporting guidance.
Reporting and assurance	No specific requirements.

Unique Reference	PR19SWB_PC A4
Measurement unit and decimal places	Percentage of peak week production capacity, reported to two decimal places.

1.1.7 Risk of severe restrictions in a drought

Purpose: To measure the resilience of each company to severe restrictions in a 1-in-200 drought and incentivise the improvement of this level of resilience in the short and longer term.

Benefits: A reduction in the risk of severe drought restrictions will reduce the associated risk of substantial costs and detrimental effects on customers' wellbeing.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC D1
Detailed definition of performance measure	The performance commitment drought risk is defined in the reporting guidance – Drought resilience metric, published on the 13th March 2018: https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Drought-resilience-metric-March-18.pdf The overall metric will be, on a company basis, the percentage of the customer population at risk of experiencing severe restrictions in a 1-in-200 year drought, on average, over 25 years.
Additional detail on measurement units	The metric will be calculated using the following formula: <i>At risk if, $DO - OA < DD + TH$</i> Where: Deployable output (supply) = DO Outage allowance (unavailable supply) = OA Dry year demand = DD Target headroom (uncertainty) = TH The annual percentage of customers at risk is then calculated by dividing total numbers of customers at risk (ie population of a water resource zone) by the total number of customers served by the company.
Specific exclusions:	As defined in the reporting guidance.
Reporting and assurance	As defined in the reporting guidance.
Measurement unit and decimal places	Percentage of population at risk reported to one decimal place

1.1.8 Priority services for customers in vulnerable circumstances

Purpose: To ensure a minimum standard across all companies for the number of households registered on the Priority Services Register (PSR) and for PSR data checking.

Benefits: This PC will help to increase the number of customers in vulnerable circumstances that receive the most appropriate service to their needs. It will also ensure the register is kept up to date.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC E6
<p>Detailed definition of performance measure</p>	<p>PSR 'reach' is defined as the percentage of households that the company supplies with water and/or wastewater services which have at least one individual registered on the company's PSR.</p> <p>PSR 'data checking' is measured by the percentage of distinct households, with at least one individual on the company's PSR, that have been contacted at least once over the previous two years to ensure that they are receiving the right support.</p> <p>A contact is defined as a proactive interaction in which contact was made with the customer and their personal information updated as a result of such contact (including confirmation of whether or not the customer needs to remain on the PSR).</p> <p>The term 'distinct households' ensures that a household with at least one individual registered on the PSR that is contacted more than once in the two preceding years shall count only once towards this measure.</p> <p>To achieve compliance with this performance commitment both the PSR reach and PSR data checking targets should be achieved.</p>
<p>Additional detail on measurement units</p>	<p>PSR reach: the percentage of households with at least one individual registered on the PSR, reported annually. This is calculated as follows:</p> $\frac{\text{Number of households with at least one individual on the PSR (measured 31st March)}}{\text{Total number of households served (measured 31st March)}}$ <p>PSR data checking: the percentage of distinct households with individuals registered on the PSR that have been contacted over the previous two reporting years (at the point of reporting) to ensure that the customer is receiving the right support. This is calculated as follows:</p> $\frac{\text{Distinct households with at least one individual on PSR contacted in last two years (measured 31st March)}}{\text{Total number of households with individuals on PSR (measured 31st March)}}$

Unique Reference	PR19SWB_PC E6
Specific exclusions	None
Reporting and assurance	<p>Companies should also report the following information:</p> <p>PSR reach: companies should present PSR membership by separately reporting forecast annual figures for individuals registered receiving support through PSR services for a) communication, b) support with mobility and access restrictions c) support with supply interruption, d) support with security and e) support with other needs.</p> <p>PSR data-checking: Companies should report the number of households added and removed from the PSR if the data is not available to report numbers of individuals. Where possible, the company should report the corresponding figure for individuals alongside this.</p>
Measurement unit and decimal places	<p>PSR reach: percentage of applicable households, reported to one decimal place.</p> <p>PSR data checking: percentage of applicable households, reported to one decimal place.</p>

1.1.9 Internal sewer flooding

Purpose: This PC is designed to incentivise companies to reduce the number of internal sewer flooding incidents.

Benefits: A reduction in internal sewer flooding reduces disruption and other negative social impacts for customers.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B1
<p>Detailed definition of performance measure</p>	<p>The internal sewer flooding measure is defined in the reporting guidance for PR19 – Sewer Flooding, published on the 27th March 2018 https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Reporting-guidance-sewer-flooding-updated-April-2018.pdf.</p> <p>The measure is calculated as the number of internal sewer flooding incidents normalised per 10,000 sewer connections including sewer flooding due to severe weather events.</p> <p>Companies might also want to present their performance commitments in absolute numbers to make it easier for customers and stakeholders to understand.</p> <p>The definitive service levels are those expressed as the values normalised per 10,000 sewer connections.</p>
<p>Additional detail on measurement units</p>	<p>Internal flooding: is defined as flooding which enters a building or passes below a suspended floor.</p> <p>Flooding event: is defined as the escape of water from a sewerage system, irrespective of size as evidenced by standing water, running water or visible deposits of silt or sewage solids. It includes flooding due to overloaded sewers (hydraulic flooding) and due to other causes (FOC).</p> <p>Number of incidents: is defined as the number of properties flooded during each flooding event from a public sewer including incidents on sewers transferred under the Transfer of Private Sewers Regulations 2011 and pumping stations transferred in 2016.</p> <p>Severe weather: is defined as individual rainfall events with a storm return period greater than 1 in 20 years. Flooding incidents caused by severe weather should be included in this measure.</p> <p>Sewer length: Include the length of the entire network, including sewers that transferred to their responsibility under the Transfer of Public Sewers Regs 2011. The company should separately record the length of transferred sewers, the calculation of this measure should be based on the latest measurements of the length.</p> <p>The absolute number of incidents is divided by the total number of the company's sewer connections and multiplied by 10,000 to derive the normalised value.</p>

Unique Reference	PR19SWB_PC B1
Specific exclusions	As defined in the reporting guidance.
Reporting and assurance	This measure will be reported as both the absolute number of internal sewer flooding incidents and a normalised value of internal flooding incidents per 10,000 sewer connections. Any changes to the number of sewer connections that will have a material impact on the performance of this measure should be highlighted in the report commentary.
Measurement unit and decimal places	Number of incidents per 10,000 sewer connections reported to two decimal places.
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% wastewater network plus
Frequency of reporting	Annually

1.1.10 Pollution incidents

Purpose: This PC is designed to incentivise companies to reduce the number of pollution incidents that impact the environment.

Benefits: Delivery of this PC will improve the quality of the environment by reducing the number of pollution incidents that occur.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F1
Detailed definition of performance measure	<p>Pollution Incidents is defined in the following guidance for PR19 – Water & Sewerage Company Environmental Performance Assessment (EPA) Methodology (version 3). Published November 2017 by the Environment Agency.</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2017/12/WatCoPerEPAMethodology_v3-Nov-2017-Final.pdf</p> <p>The total number of pollution incidents (categories 1 to 3) per 10,000km of sewer length for which the company is responsible in a calendar</p>
Additional detail on measurement units	As defined in the reporting guidance
Specific exclusions	<p>Are as defined in the reporting guidance</p> <p>This performance commitment does not apply to the Isles of Scilly until 2025.</p>
Reporting and assurance	<p>This measure will be reported as both the absolute number of pollution incidents and a normalised value of pollution incidents per 10,000km of sewer.</p> <p>Any changes to the length of the wastewater network that will have a material impact on the performance of this measure should be highlighted in the report commentary.</p>
Measurement unit and decimal places	Number of pollution incidents per 10,000 km of the wastewater network reported to two decimal places.

1.1.11 Risk of sewer flooding in a storm

Purpose: This PC is designed to incentivise companies to better understand flood risk in their region and utilise this knowledge to develop long term strategies and so over the long term reduce the risk of sewer flooding.

Benefits: Reduction of flood risk during storm events protects customers and the environment from the disruption and costs associated with flood events. Reduced cost of flood resilience for customers through a better understanding of flood risks and appropriate interventions.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC D2
Detailed definition of performance measure	Risk of sewer flooding in a storm is defined within the guidance titled Developing and Trialling Wastewater Resilience Metrics, published on the 7th November 2017: https://www.ofwat.gov.uk/wp-content/uploads/2017/12/Developing-and-Trialling-Wastewater-Resilience-Metrics-Atkins.pdf This measure will record the percentage of the region's population at risk from internal hydraulic flooding from a 1 in 50-year storm, based on modelled predictions.
Additional detail on measurement units	See guidance document for full details of the calculation and measurements units.
Specific exclusions	As defined in the guidance.
Reporting and assurance	As defined in the guidance.
Measurement unit and decimal places	Percentage of population at risk, reported to two decimal places.

1.1.12 Sewer collapses

Purpose: This PC is designed to incentivise that the asset health of the infrastructure or below-ground wastewater assets is being appropriately maintained and improved and that the company is committed to its asset stewardship responsibility.

Benefits: This PC helps to ensure that the overall asset health of the below-ground wastewater assets is maintained and improved for the benefit of current and future generations.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B3
Detailed definition of performance measure	Sewer collapses is defined in the reporting guidance for PR19 – Sewer Collapses per 1000km, published on the 27 th March 2018. https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Reporting-guidance-sewer-collapses-per-1000km.pdf Number of sewer collapses per 1000 kilometres of all sewers causing an impact on service to customers or the environment
Additional detail on measurement units	Sewer collapse: A sewer collapse is considered to be where a structural failure has occurred to the pipe that results in a service impact to a customer or the environment and where action is taken to replace or repair the pipe to reinstate normal service. The measure intentionally does not refer to the magnitude of the collapse. The measure includes rising mains. Collapses on the entire network are to be reported. Sewer length: Include the length of the entire network, including sewers that transferred to their responsibility under the Transfer of Public Sewers Regs 2011. The company should separately record the length of transferred sewers, the calculation of this measure should be based on the latest measurements of the length.
Specific exclusions	As defined in the guidance.
Reporting and assurance	The company is also required to report the number of occasions where a failure has occurred to the pipe that results in either any contact with the company (i.e. an impact on service has caused someone to contact the company) or any unplanned escape of wastewater and results in spot repairs or relining.
Measurement unit and decimal places	Number of collapses per 1000km of sewer network, reported to two decimal places

1.1.13 Treatment works compliance

Purpose: This PC is designed to incentivise that the asset health of the non-infrastructure or above-ground wastewater assets is being appropriately maintained and improved and that the company is committed to its asset stewardship responsibility.

Benefits: This PC helps to ensure that the overall asset health of the above-ground wastewater assets is maintained and improved for the benefit of current and future generations.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B6
Detailed definition of performance measure	Treatment works compliance is defined in the reporting guidance for PR19 – Water & Sewerage Company Environmental Performance Assessment (EPA) Methodology (version 3). Published November 2017 by the Environment Agency. https://www.ofwat.gov.uk/wp-content/uploads/2017/12/WatCoPerfEPAmethodology_v3-Nov-2017-Final.pdf The discharge permit compliance metric is reported as the number of failing sites (as a percentage of the total number of discharges) and not the number of failing discharges.
Additional detail on measurement units	A discharge can be confirmed as failing for a number of breaches of a numeric permit at wastewater treatment works and water treatment works, these are set out in the Environment Agency guidance.
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage compliance, reported to two decimal places.
Measurement timing	Calendar year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% wastewater network plus

Unique Reference	PR19SWB_PC B6
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020, whereas 2024-25 assessment will be based on the calendar year 2024.
Any other relevant information	Performance against this PC is also published annually in Environment Agency water and sewerage companies' annual report.
Links to relevant external documents	See Environment Agency website for annual reports

1.2 Bespoke performance commitments

This section sets out the detail for each of the bespoke performance commitments and outcome delivery incentives we are putting in place for the company for the period 2020-2025.

Companies have developed bespoke performance commitments that reflect customers' preferences. Allowing companies to propose their own performance commitments, allows them to innovate and target their customers' values and concerns in the context of their specific circumstances.

1.2.1 Taste, smell and colour contacts

Purpose: This PC incentivises the company to reduce water quality contacts relating to appearance, taste and odour.

Benefits: This PC improves the appearance, taste and odour of drinking water by incentivising the company to reduce the number of customer contacts it receives in relation to the appearance of drinking water.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC A5
Detailed definition of performance measure	<p>The customer contact classification guidance is published by the Drinking Water Inspectorate (DWI) as <i>Information Letter 1/2006</i>, 6 January 2006, at</p> <p>– http://dwi.defra.gov.uk/stakeholders/information-letters/2006/01_2006.pdf .</p> <p>Consumers contact a water company for various water quality reasons. Only consumer contacts that are about appearance and taste and odour will be included in this measure.</p>
Additional detail on measurement units	<p>The number of times the company is contacted due to the taste and odour of drinking water, or due to drinking water not being clear, reported per 1,000 population. Calculation is the number of contacts for discoloured water (brown/black/orange/white-air/ white-chalk) plus all taste/odour contacts multiplied by 1,000 divided by the resident population.</p>
Specific exclusions	<p>See DWI guidance for a full list of exclusions.</p> <p>This performance commitment does not apply to the Isles of Scilly until 2025.</p>
Reporting and assurance	<p>The company is also required to report consumer contacts separately for appearance as well as taste and odour for DiscoverWater.</p>
Measurement unit and decimal places	<p>Number of customer contacts per 1,000 population, reported to two decimal places.</p>
Measurement timing	<p>Calendar year</p>
Incentive form	<p>Revenue</p>
Incentive type	<p>Outperformance and underperformance payments</p>
Timing of underperformance and outperformance payments	<p>In-period</p>
Price control allocation	<p>100% water network plus</p>

Unique Reference	PR19SWB_PC A5
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020 data, whereas 2024-25 assessment will be based on the calendar year 2024 data.
Any other relevant information	NA
Links to relevant external documents	The DiscoverWater website link for this measure is https://discoverwater.co.uk/colour and taste and odour at https://discoverwater.co.uk/taste

1.2.2 Water restrictions placed on customers

Purpose: The purpose of this PC is to incentivise the company to avoid drought-related restrictions on water use by customers in line with its statutory drought plan.

Benefits: The benefit of this PC is to minimise customer restrictions on water use.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC C1
Detailed definition of performance measure	<p>This performance commitment measures the number of drought restrictions that the company puts in place for each year of the period 2020-25.</p> <p>The definition of water restrictions include: 1. Temporary bans on water use as provided for in Section 76 of the Water Industry Act 1991, as amended by Section 36 of the Flood and Water Management Act 2010 and detailed in The Water Use (Temporary Bans) Order 2010. The terms 'temporary bans on water use', and 'temporary use ban' replace the old reference to hosepipe bans;</p> <p>2. Ordinary drought orders, as provided for in Sections 73 to 81 and Schedules 8 and 9 of the Water Resources Act 1991 and detailed in the Drought Direction 2011; and</p> <p>3. Emergency Drought Orders as defined in the Water Resources Act 1991.</p>
Additional detail on measurement units	<p>One restriction shall be defined as the company implementing water restrictions during a discrete drought event. Only one unit will be counted for each drought event, so if the company implements different types of restrictions or implements restrictions in other zones at a later date during the same drought event it will still count as one unit for the whole event.</p> <p>Although unlikely it is possible for more than one unit to be accrued in any one year, for example if a drought ends as defined by the water company's drought plan or the company declares the drought has ended and then needs to move back into drought and reapply restrictions this would count as another unit.</p>
Specific exclusions	The area considered by this measure includes all of the company's supply area with the exception of the Isles of Scilly.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of restrictions to zero decimal places
Measurement timing	Reporting year
Incentive form	RCV

Unique Reference	PR19SWB_PC C1
Incentive type	Underperformance payment
Timing of underperformance and outperformance payments	End of period
Price control allocation	10% water resources and 90% water network plus

1.2.3 External sewer flooding incidents

Purpose: This PC is designed to incentivise companies to reduce the number of external sewer flooding events.

Benefits: A reduction in the number of external sewer flooding reduces disruption and other negative social impacts for customers.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B2
Detailed definition of performance measure	<p>The external sewer flooding measure is defined in the reporting guidance for PR19 – Sewer Flooding, published on the 27th March 2018.</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2018/03/Reporting-guidance-sewer-flooding-updated-April-2018.pdf</p> <p>The PC will be reported as the absolute number of the company's external sewer flooding incidents per year including incidents caused by severe weather.</p>
Additional detail on measurement units	<p>External flooding: is defined as flooding within the curtilage of a building normally used for residential, public, community and business purposes.</p> <p>Flooding event: is defined as the escape of water from a sewerage system, irrespective of size as evidenced by standing water, running water or visible deposits of silt or sewage solids. It includes flooding due to overloaded sewers (hydraulic flooding) and due to other causes (FOC).</p> <p>Number of incidents: is defined as the number of curtilages flooded during each flooding event from a public sewer including incidents on sewers transferred under the Transfer of Private Sewers Regulations 2011 and pumping stations transferred in 2016.</p> <p>Severe weather: is defined as individual rainfall events with a storm return period greater than 1 in 20 years. Flooding incidents caused by severe weather should be included in this measure See guidance for full definition</p>
Specific exclusions	Are as defined in the reporting guidance.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of incidents to zero decimal places.
Measurement timing	Reporting year
Incentive form	Revenue

Unique Reference	PR19SWB_PC B2

1.2.4 Sewer blockages

Purpose: The purpose of this PC is to incentivise the company to reduce the number of sewer blockages, which is a significant contributing factor to sewer flooding.

Benefits: The benefit of this measure is a reduced number of sewer blockages and sewer flooding incidents affecting customers.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B4
Detailed definition of performance measure	<p>The total number of sewer blockages on the company's sewer network (including sewers transferred in 2011) reported on a reporting year basis.</p> <p>A blockage is an obstruction in a sewer which causes a reportable problem (not caused by hydraulic overload), such as flooding or discharge to a watercourse, unusable sanitation, surcharged sewers or odour.</p> <p>The full definition can be found here: https://www.ofwat.gov.uk/wp-content/uploads/2017/12/Sewer-blockages.pdf</p>
Additional detail on measurement units	None
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of sewer blockages to zero decimal places
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% wastewater network plus

Unique Reference	PR19SWB_PC B4
Frequency of reporting	Annually
Any other relevant information	Any outperformance and underperformance payments will be applied on an annual basis
Links to relevant external documents	NA

1.2.5 Odour contacts from wastewater treatment works

Purpose: The purpose of this PC is to incentivise the company to manage treatment processes at its wastewater treatment works in such a way as to limit odours that are unpleasant to customers.

Benefits: The benefit of this PC is a reduction in negative impact on people in houses and properties surrounding wastewater treatment works resulting from unpleasant odours released from the works.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B5
Detailed definition of performance measure	The total number of contacts from customers about odour from the company's wastewater treatment works measured on a reporting year basis.
Additional detail on measurement units	None
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of contacts to zero decimal places.
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% wastewater network plus
Frequency of reporting	Annually

1.2.6 Descriptive compliance

Purpose: The purpose of this PC is to incentivise the company to manage its wastewater treatment services such that it is fully compliant with the descriptive discharge standards set by the Environment Agency.

Benefits: The benefit of this PC is that pollution to the environment from treated water discharges from sites operating under descriptive discharge consents will be minimised.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B7
Detailed definition of performance measure	The percentage of compliant wastewater treatment works operating under 'descriptive' discharge consent limits as set and assessed by the Environment Agency.
Additional detail on measurement units	The percentage compliant is worked out as 100% less the percentage of sites failing. The percentage of sites failing is calculated by dividing the 'number of sites failing' by the 'number of descriptive assets'.
Specific exclusions	There are no specific exceptions.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage compliance, reported to 1 decimal place.
Measurement timing	Calendar year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% wastewater network plus
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020 data, whereas 2024-25 assessment will be based on the calendar year 2024 data.
Any other relevant information	None

Unique Reference	PR19SWB_PC B7

1.2.7 Total wastewater treatment works (WWTW) compliance

Purpose: The purpose of this PC is to incentivise the company to manage its wastewater treatment services such that it is fully compliant with the numeric and descriptive discharge standards set by the Environment Agency.

Benefits: The benefit of this PC is that pollution to the environment from treated water discharges from sites operating under numeric and descriptive discharge consents will be minimised.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B8
Detailed definition of performance measure	Sewage treatment works are a mix of larger sites with regulatory sampling, covered by numeric consent standards and smaller sites covered by descriptive consents. This PC averages PR19SWB_PC B6 Numeric Compliance and PR19SWB_PC B7 Descriptive Compliance into a single non-financial measure to measure overall percentage treatment works compliance.
Additional detail on measurement units	The total wastewater treatment works percentage compliance is calculated as the sum of PR19SWB_PC B6 Numeric Compliance and PR19SWB_PC B7 Descriptive Compliance, divided by two.
Specific exclusions	There are no specific exclusions.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage compliance, reported to 1 decimal place.
Measurement timing	Calendar year
Incentive form	Reputational
Incentive type	NA
Timing of underperformance and outperformance payments	NA

1.2.8 Compliance with sludge standard

Purpose: The purpose of this PC is to ensure that the company is operating in compliance with its obligations regarding sludge use and disposal.

Benefits: The benefit of this PC is to minimise negative environmental and public health impacts from the beneficial reuse of sewage sludge to agricultural land or the disposal of sewage sludge through any other outlet.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC B9
Detailed definition of performance measure	<p>The commitment measures the overall percentage of company sludge satisfactorily used or disposed of in line with the Environment Agency’s Environmental Performance Assessment (EPA) definition, which includes compliance with Environmental laws, including:</p> <p>The Sludge (Use in Agriculture) Regulations; and Environmental Permitting (England and Wales) Regulations 2010. Water company voluntary compliance with the Safe Sludge Matrix.</p> <p>The measure will continue to comply with any revisions to the Environment Agency EPA definition for each year, and performance for the PC will be aligned to the Environment Agency’s assessment of performance.</p>
Additional detail on measurement units	<p>Reporting is on the basis of tonnes dry solids (tds) disposed to agricultural land in a compliant manner as a percent of total raw tds production.</p> <p>Calculation = 1- unsatisfactory use or disposal tds utilised / total raw tds production</p> <p>The measurement includes all sludge that the company produces in its wastewater treatment process that it treats. It also includes all sludge traded; both imports and exports.</p> <p>The company will ensure that:</p> <p>sludge imported from 3rd parties meets the same disposal standards as sludge it produces and disposes of.</p> <p>sludge exported to third parties will be contractually assured to meet the company’s own internal standards, and the Environment Agency’s EPA requirements before being exported.</p>
Specific exclusions	<p>Exemptions are in line with the EPA definition, and will change in line with the EPA if these change in the future. In the most recent version of the EPA (v3) the following exemptions are included:</p> <p>solids added during the sludge treatment process, e.g. lime added during the treatment process;</p>

Unique Reference	PR19SWB_PC B9
	grit and screenings and water treatment sludge; and treatment related breaches that do not result in non-compliant sludges or residual products going to any outlets. Incineration is considered an 'outlet' for these purposes rather than a treatment.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage compliance reported to 2 decimal places.
Measurement timing	Calendar year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	In-period
Price control allocation	100% Bioresources
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020 data, whereas 2024-25 assessment will be based on the calendar year 2024 data.

1.2.9 Resilience in the round - wastewater

Purpose: The measure is designed to ensure that resilience action plans are put in place at wastewater treatment works to help protect sites from flooding and recover treatment process as quickly as possible following a flood event.

Benefits: The benefit of this PC is that through the development and implementation of resilience action plans the impact of environmental and economic damage due to flood events at wastewater treatment works will be mitigated.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC D3
Detailed definition of performance measure	<p>The measure relates to the ability to protect and quickly recover treatment processes at wastewater treatment works in the case of extreme weather events. It is measured as the number of resilience action plans put in place for wastewater treatment works.</p> <p>Resilience action plans will be developed for key wastewater treatment works and assets, which are defined as those most at risk of flooding according to Environment Agency flood risk maps. These are sites within the 1:1000 extreme flood outline, as published by the Environment Agency.</p>
Additional detail on measurement units	<p>The key assets for which resilience plans will be developed have been agreed with the Environment Agency and this should be evidenced.</p> <p>Resilience action plans will include:</p> <ul style="list-style-type: none"> resilience measures to reduce the risk of flooding of assets through direct protection measures and/or delivery of Drainage and Wastewater Management Plans; operational plans and/or asset interventions to enable recovery of treatment processes as quickly as possible after extreme weather events; and information on the right stock of equipment to store and deploy rapidly following any flooding to ensure the company can bring the site online quickly, through rapid replacement of mechanical and electrical equipment and restarting the biological processes. <p>Plans will be a continual learning process and be reviewed and updated following flood events or when new information is made available by the Environment Agency or Risk Management Authorities.</p>
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of resilience action plans at wastewater treatment works to zero decimal places

Unique Reference	PR19SWB_PC D3

1.2.10 Resilience in the round - water

Purpose: The purpose of this measure is to incentivise the company to reduce the number of customers (properties) that experience an unplanned loss of supply of greater than 12 hours.

Benefits: The benefit of this PC is that it will help reduce disruption to, and financial impact on, customers from extended supply interruptions.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC D4
Detailed definition of performance measure	The number of properties affected by unplanned interruption to supply of greater than 12 hours duration.
Additional detail on measurement units	<p>The number of customers (properties) who experience continuous unplanned loss of mains water supply to their property for durations greater than 12 hours. This can be due to flooding, or other events such as third-party damage, freeze and thaw conditions, catastrophic asset failure, lightning storms, etc. This measure captures all hazards that can impact on water supplies.</p> <p>A loss of supply will be considered unplanned if the water company did not give the affected customers a 48 hours' notice of a planned interruption.</p> <p>Properties affected by repeat unplanned interruptions on the same day will only be counted separately where there is a minimum of one hour between the interruptions. When shorter gaps occur, the duration is counted from the start of the first interruption until the last restoration of supply.</p>
Specific exclusions:	The company may make a representation to Ofwat for unplanned interruptions at properties to be excluded on the basis of a civil emergency under the Civil Contingencies Act 2004, where a supply interruption is not the cause of the emergency.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of properties experiencing a supply interruption of 12hrs or more to zero decimal places
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Outperformance and underperformance payments

1.2.11 Operational contacts resolved first time - water

Purpose: This PC is designed to incentivise the company to resolve water operational contacts first time without customers needing to contact the company a second time for the same issue.

Benefits: The benefit of this PC will be that customer-facing water operational issues will be dealt with efficiently and at the first time of asking.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC E2
Detailed definition of performance measure	The percentage of wholesale water operational customer contacts that are resolved first time. Calculated as 100% minus the number of wholesale water operational contacts which the audited South West Water system and process records as a repeat contact from the same customer on the same issue as a proportion of all wholesale water operational contacts.
Additional detail on measurement units	The operational contacts included within this PC encompass all written and telephone contacts received by the company.
Specific exclusion	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage of wholesale water operational customer contacts that are resolved first time, reported to one decimal place.

1.2.13 Customer satisfaction with value for money

Purpose: The purpose of this PC is to incentivise the company to deliver a water and wastewater service that represents value for money for residential customers.

Benefits: Assessing customer views on value for money is an important factor in understanding drivers of legitimacy with customers and in ensuring that satisfaction with the service provided to customers continues to improve.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC E5
Detailed definition of performance measure	The percentage of household customers satisfied, very satisfied or extremely satisfied with the value for money of South West Water's services in the reporting year, as measured through the company's customer satisfaction tracking survey.
Additional detail on measurement units	<p>This performance commitment is measured independently through the company's long-term customer satisfaction tracking survey. The survey will be delivered through a combination of computer-assisted telephone interviewing (CATI), online and face-to-face. The balance between delivery methods will be reviewed annually. The survey will be conducted by independent third party market researchers and in compliance with the Market Research Society Code of Conduct.</p> <p>Research quotas are set to ensure that samples are representative of the population by an external market researcher based on Census data. The total sample size across the year will be 1200 (900 in the South West Water region and 300 in the Bournemouth Water region) with quotas set for age, gender, socio-economic group and location. To ensure continuity of results to allow comparison across the period the question asked in the survey will remain in the same format, with the respondents being asked to provide a score on a seven point scale reflecting how satisfied they are with the value for money of the services they receive. Seven is Extremely Satisfied and one is Extremely Dissatisfied.</p> <p>Data is provided quarterly, and this performance commitment is the average of responses over the reporting year.</p>
Specific exclusions	None
Reporting and assurance	The company is required to put in place external audit on an annual basis.
Measurement unit and decimal places	Percentage of household customers, reported to zero decimal places.

1.2.14 British Standard for Inclusive Service Provision

Purpose: This measure commits South West Water to provide support for customers in vulnerable circumstances in line with the British Standards Institution (BSI) inclusive service provision.

Benefits: The PC will help ensure that the company provides a fair, flexible service that can be used by all customers equally, regardless of their health, age or personal circumstances.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC E7
Detailed definition of performance measure	<p>This measure assesses the quality of the Priority Services scheme via the British Standard for Inclusive Service Provision certification BS 18477.</p> <p>To meet its targets for this performance commitment the company must achieve the BS 18477 standard in 2020-21 and maintain the standard thereafter. South West Water meets this performance commitment if it has in place on the 31 March of the assessment year a BSI certification for standard BS 18477. If certification from BSI is not in place on 31 March of the reporting year, the performance commitment is reported as not achieved or not maintained (depending on prior year performance).</p> <p>The performance commitment applies each year, and demonstration that the certification is in place must be tested and reported each year. BS 18477 certification is awarded by BSI Group (also known as the British Standards Institution).</p> <p>In the event that BSI Group cease providing certification for BS 18477 during the period 2020-25 the company should adopt any standard designed to directly succeed the existing standard. If one is not available, it will assess whether there exist other appropriate standards that can be used as an alternative independently assessed indicator of the quality of support for customers in vulnerable circumstances.</p>
Additional detail on measurement units	This measure is reported as Achieved/Maintain or Not achieved / Not maintained.
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Text (achieve/maintain or not achieved/not maintained).
Measurement timing	Reporting year

1.2.15 Overall satisfaction of services received on the PSR

Purpose: To ensure that the company's customers that are registered for the Priority Services Register (PSR) are satisfied with the services they receive through the PSR.

Benefits: This PC will help ensure that customers in vulnerable circumstances are satisfied with the services they receive from the company.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC E8
Detailed definition of performance measure	<p>This PC measures the percentage of customers who receive services through the PSR that are satisfied, very satisfied or extremely satisfied with the services that they receive.</p> <p>Respondents will be asked if they have relied on PSR services, and if so, the last use and frequency of use of the services in general. For those that have used PSR services in the last two years, they will be asked their satisfaction with those services.</p> <p>The survey will have a total sample size of 275 to 325 (225 to 250 in the South West Water region and 50 to 75 in the Bournemouth Water region) and quotas set for age, gender and socio-economic group. The survey will be conducted by independent third party market researchers and in compliance with the Market Research Society Code of Conduct.</p>
Additional detail on measurement units	<p>This PC is calculated through the following formula: $A = B/C$ Where: A: the percentage of customers who receive services through the PSR that are satisfied, very satisfied or extremely satisfied with these services that they receive. B: Number of customers that receive services through the PSR that are satisfied, very satisfied or extremely satisfied with the services received. C: Number of customers that receive services through the PSR.</p>
Specific exclusions	None
Reporting and assurance	The company is required to put in place external audit on an annual basis.
Measurement unit and decimal places	Percentage of customers that receive services through the PSR, reported to zero decimal places.
Measurement timing	Reporting year
Incentive form	Reputational

1.2.16 Number of pollution incidents cat 1-3 (water only)

Purpose: The purpose of this PC is to incentivise the company to reduce pollution incidents from wholesale water assets.

Benefits: The benefit of this PC is to reduce negative impact of the company's activities on the environment resulting from contaminants flowing into the environment from water pipes and equipment.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F2
Detailed definition of performance measure	<p>The number of incidents of contaminants flowing into the water environment from water pipes and equipment. These pollution incidents are defined as Category 1 to 3 by the Environment Agency (EA) according to the environmental impact of the incident.</p> <p>Incidents and their classification: the Common Incident Classification Scheme (CICS), Ref: 04_01, Issued 23/9/2016 by the Environment Agency</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2017/12/20171129-Incidents-and-their-classification-the-Common-Incident-Classification-Scheme-CICS-23.09.16.pdf</p>
Additional detail on measurement units	None
Specific exclusions	This performance commitment does not apply to the Isles of Scilly until 2025.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of pollution incidents, reported to zero decimal places.
Measurement timing	Calendar year
Incentive form	Revenue

1.2.17 Biodiversity - Compliance

Purpose: The purpose of this PC is to incentivise the company to avoid pollution that harms special wildlife conservation areas.

Benefits: Wildlife conservation areas are particularly vulnerable to environmental damage from pollution incidents and this measure will help ensure that the company operates in such a way as to avoid these.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F3
Detailed definition of performance measure	<p>The number of pollution incidents that occur in special wildlife conservation areas (such as freshwater Natura 2000, Sites Special Scientific Interest (SSSIs), and Country Wildlife Sites (CWS)). The measure only considers category 1 or 2 pollution incidents as defined by the Environment Agency.</p> <p>Incidents and their classification: the Common Incident Classification Scheme (CICS), Ref: 04_01, Issued 23/9/2016 by the Environment Agency</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2017/12/20171129-Incidents-and-their-classification-the-Common-Incident-Classification-Scheme-CICS-23.09.16.pdf</p>
Additional detail on measurement units	<p>The number of category 1-2 pollution incidents in freshwater Natura 2000, SSSIs and Country Wildlife Sites, reported on a calendar year basis monitored via the NIRS (National Incident Reporting System) with the location of those events recorded using a NGR reference. The performance of the measure will be cross-reference against the NIRS once the data has been reviewed by the Environment Agency and the water company.</p>
Specific exclusions:	<p>This performance commitment does not apply to the Isles of Scilly until 2025.</p> <p>Marine Conservation Zones (MCZs) are excluded as impacts on pollution incidents on these are not yet well understood.</p>
Reporting and assurance	No specific requirements.

1.2.18 Biodiversity - Prevent Deterioration

Purpose: The purpose of this measure is to incentivise the delivery of installations at South West Water sites which are designed to prevent the spread of Invasive Non-native Species (INNS).

Benefits: INNS can cause significant damage to native plants and animals and reduce the overall diversity of a region. The measure will help prevent the spread of INNS with the aim of preserving regional biodiversity.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F4
Detailed definition of performance measure	<p>This measures the number of installations that have been delivered to prevent or control the spread of invasive non-native species (INNS) at South West Water sites. INNS are any non-native animals or plants that have the ability to spread causing damage to the environment, the economy, our health and the way we live.</p> <p>Alongside the requirements under the Water Industry National Environment Programme (WINEP), the company will agree with the Environment Agency the sites and facilities to be installed at those sites to maximise the effectiveness of the investment.</p>
Additional detail on measurement units	<p>The number of site installations per financial year where the following have been delivered:</p> <ul style="list-style-type: none"> • Wash down facilities - facilities for installing wash down systems for boating activity, water sports or recreation activity; and • Biosecurity signage - highlighting the procedures to manage the risks associated with the spread of invasive non-native species to water supply security, the impact on flora and fauna and the actions needed to control them. <p>A washdown facility is counted as a specific installation (i.e. if the company installs two washdown facilities at a site, this would count as two installations). Signage is counted on a site basis (i.e. if ten signs are put in place at one reservoir, this would only count as one installation). An installation is considered to have been achieved when the activity above has been delivered and in service.</p>
Specific exclusions	Any installations not on South West Water sites.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of installations to zero decimal places
Measurement timing	Reporting year

1.2.19 Biodiversity - Enhancement

Purpose: This PC is designed to incentivise an increase in the area of land under active improved catchment management.

Benefits: Active improved catchment management can protect and improve river quality and critical water abstraction sources to provide clean, safe drinking water without the need to provide additional infrastructure.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F5
Detailed definition of performance measure	<p>The PC is defined as the hectares of the ‘Upstream Thinking’ project catchments that are under active improved catchment management as part of ‘Upstream Thinking’ project interventions. The active improved management area is defined as:</p> <ul style="list-style-type: none"> • Active plan areas - land within Upstream thinking farm plans which have actions being carried out • Areas of habitat improvement not in farm plans- for example Mires and Culm grassland projects • Other Upstream thinking actions not in farm plans – for example areas of land which have been improved by use of the Upstream thinking sub-soil equipment.
Additional detail on measurement units	<p>‘Upstream Thinking’ is South West Water’s catchment management programme in the major drinking water abstraction catchments of the region. It uses a range of interventions to reduce pollutant load in water sources to improve water quality or to slow water within catchment and thereby increase resilience to both drought and flood events. In doing so it delivers benefits to the environment through:</p> <ul style="list-style-type: none"> • improved biodiversity - due to land restoration and habitat creation; • reduced carbon emissions - through carbon sequestration and reduced fertilizer use; • climate change mitigation – through slowing water flows and reducing carbon emissions; and • social benefits - through improved farm productivity and in turn income generation.
Specific exclusions:	None.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	As hectares under improved active catchment management to zero decimal places

1.2.20 EPA

Purpose: The purpose of this PC is to incentivise the company to improve its environmental performance assessment (EPA) rating from the Environment Agency.

Benefits: Meeting the criteria for a higher rating in the Environmental Performance Assessment (EPA) will demonstrate that the company is working to improve its environmental performance.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC F6
Detailed definition of performance measure	<p>The Environmental Performance Assessment (EPA) is carried out by the Environment Agency each year and is used to derive a rating to compare companies. It is defined in the following guidance for PR19 – Water & Sewerage Company Environmental Performance Assessment (EPA) Methodology (version 3). Published November 2017 by the Environment Agency.</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2017/12/WatCoPerfEPAmethodology_v3-Nov-2017-Final.pdf</p>
Additional detail on measurement units	<p>The 2017 edition of the EPA consists of seven metrics, those are:</p> <ol style="list-style-type: none"> 1. Numeric permit compliance including water treatment works discharge compliance 2. Total pollution incidents (categories 1, 2 and 3) for the sewerage system (normalised) 3. Serious pollution incidents (category 1 & 2) for the sewerage system (normalised) 4. Percentage self reporting of pollution incidents 5. National Environment Programme (NEP) scheme delivery 6. Satisfactory Sludge Use/Disposal 7. Security of Supply Index (SoSI) <p>The star ratings are given out of a total possible score of four stars and are applied to each company after assessment of the seven metrics set out in the definition. Each of the seven metrics are assigned a colour (red, amber or green) based on a set of criteria relating to how well the company has performed. The ratings are based on the following:</p> <p>4 Star - six or more green metrics and no red metrics 3 Star - three or more green metrics and no red metrics 2 Star - one or two red metrics and/or two or less green metrics</p>

Unique Reference	PR19SWB_PC F6
	1 Star - three or more red metrics
Specific exclusions	Specific exclusions are as defined in the current definition.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Numerical Star rating reported to zero decimal places
Measurement timing	Calendar year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	In period
Price control allocation	15% water resources 85% Water network plus
Frequency of reporting	Annual, on a calendar year basis. For example, performance assessment for 2020-21 will be based on the calendar year 2020 data, whereas 2024-25 assessment will be based on the calendar year 2024 data.
Any other relevant information	This definition may be subject to future refinement and updates by the Environment Agency and as such may be superseded during the period 2020-25. The company will comply with whichever is the most current version of this definition, as used by the Environment Agency, to define the star rating each year for this performance commitment
Links to relevant external documents	NA

1.2.21 Bathing water quality

Purpose: The purpose of this PC is to incentivise the company to improve water quality at the beaches designated for swimming within its region, in line with its Water Industry National Environment Programme (WINEP) commitments.

Benefits: By encouraging the improvement of bathing water quality, this PC will enhance coastal environments, whilst also supporting the continued development of the leisure and tourism industries in the South West region.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC H1
<p>Detailed definition of performance measure</p>	<p>Detailed definition of performance measure</p> <p>This PC will measure the number of beaches at which bathing water quality classification has improved relative to WINEP requirements. The company's WINEP programme obliges it to improve bathing water quality classification at eight additional beaches by 31st March 2025. The company's score against this performance commitment will be based on the following factors:</p> <ul style="list-style-type: none"> The number of bathing waters meeting or exceeding Environment Agency; requirements identified in the WINEP; The number of bathing waters downgraded during 2020-25 (based on Environment Agency annual classification data) where the cause is solely attributable to South West Water. Pollution Risk Forecasting is part of the Environment Agency classification process; and The number of bathing waters where South West Water are investigating the potential for improved status under the WINEP, and deliver an improvement bathing water classification as a result of improvement actions identified in those investigations (and agreed with the Environment Agency) directly or through partnership activities. <p>This PC will be calculated annually, although any outperformance or underperformance payments accrued as a result of annual performance will only be paid at the end of the 2020-25 period. In each given year, this PC will measure the net number of beaches at which water quality has been improved relative to the WINEP requirement of eight beach improvements. The PC will be calibrated such that a zero score will indicate that eight beach improvements have been delivered as per WINEP requirements. A score above zero will indicate that the company has delivered all of its WINEP-mandated improvements whilst also improving bathing water quality classification at one or more additional beaches.</p>

Unique Reference	PR19SWB_PC H1
Additional detail on measurement units	The company must improve bathing water quality at the following eight beaches under the terms of its WINEP programme: Budleigh Salterton Salcombe South Sands Dawlish Town Goodrington Par Plymouth Hoe East Seaton (Cornwall) Portmellon
Specific exclusions	Bathing water quality downgrades that are not solely attributable to South West Water, such as agricultural run-off for example, are excluded from the assessment of this PC. Where there is a deterioration in water quality classification, South West Water will present all evidence of culpability, or not, to the independent Watershare Panel. The Panel will assess whether the company is solely culpable in all such instances and it will thereby decide whether each bathing water quality downgrade should count towards the measurement of this PC.
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Number of beaches at which bathing water quality is improved relative to the requirements set out by 31 st March 2025 in the Water Industry National Environment Programme, reported to zero decimal places.
Measurement timing	Reporting year (1 st April – 31 st March)
Incentive form	RCV
Incentive type	Outperformance and underperformance payments

1.2.22 Abstraction incentive mechanism

Purpose: The purpose of this PC is to incentivise the company to reduce abstraction from environmentally sensitive sites when flows or levels are low.

Benefits: The benefit of this PC is that environmentally sensitive sites are preserved by avoiding abstracting water from them during lower levels or flows.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC H2
<p>Detailed definition of performance measure</p>	<p>The abstraction incentive mechanism (AIM) reduces abstraction of water at environmentally sensitive sites when flow or levels are below an agreed point otherwise known as a trigger. The trigger point is based on a level or flow, below which the AIM is considered to be “switched on”. This trigger will usually be related to the point at which damage is caused and is intended to prevent this from happening or ameliorate the negative impacts.</p> <p>The company has included one site for the period 2020-25:</p> <p>Otter Valley: This site is a groundwater source in the Otter Valley, East Devon the trigger is 99.8 mAOD measured from Woodbury common #2. The baseline is 7.2 MI/d and the commitment for the period 2020-25 is to improve performance by reducing abstraction by 1 MI/d by 2025.</p> <p>The abstraction incentive mechanism is defined in the reporting guidance – Guidelines on the abstraction incentive mechanism, published on the 29th April 2016:</p> <p>https://www.ofwat.gov.uk/wp-content/uploads/2016/02/gud_pro20160226aim.pdf</p>
<p>Additional detail on measurement units</p>	<p>AIM performance is measured in megalitres (MI) and is equal to the average daily abstraction during the period when flows are at or below the trigger threshold minus the baseline average daily abstraction during the period when flows are at or below the trigger threshold, multiplied by the length of the period when flows are at or below the trigger threshold.</p> <p>AIM performance in MI = (average daily abstraction during period when flows are at or below the trigger threshold - baseline average daily abstraction during period when flows are at or below the trigger threshold) * length of period when flows are at or below the trigger threshold.</p> <p>For example, if the AIM baseline was 5 MI/day and if the company abstracts an average of 4 MI/day from the abstraction site when river flows are below the trigger threshold. If flows were below the threshold for 100 days then the company has improved its performance relative to the baseline by (4 MI/day minus 5 MI/day)*100 days = -100 MI. A negative number signifies an</p>

Unique Reference	PR19SWB_PC H2

1.2.23 Installation of AMR meters

Purpose: This PC measures the number of Automatic Meter Read (AMR) meters installed for households.

Benefits: AMR meters reduce the cost of meter readings and allow for more regular readings to be taking. This improves the quality of data for the customer to better control their use and the company to optimise their actions in response to demand.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC G1
Detailed definition of performance measure	The number of AMR meters installed each year, measured on a reporting year basis. An AMR meter is deemed to have been installed when the meter type has been changed to an AMR type for a property on the company meter asset register.
Additional detail on measurement units	The performance commitment measures the total number of AMR meters installed for: <ul style="list-style-type: none"> • optant meter installations; • new connection meter installations; and • existing meter replacement installations.
Specific exclusions:	This PC only applies to residential customers' meters and excludes business customers' meters. A meter can only be counted once in the five year period for a property. For example, if a meter then fails within the five years and is replaced, it cannot be recounted towards this performance commitment.
Reporting and assurance:	No specific requirements.

1.2.24 Number of customers on one of our support tariffs

Purpose: The purpose of this PC is to incentivise the company to increase the number of customers, who are struggling to pay their water bill, that receive financial support through one of the company's support tariffs.

Benefits: The benefit of this PC is an increase in the number of customers receiving appropriate financial support which in turn could make these customers' bills more affordable.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC G2
Detailed definition of performance measure	<p>The number of customers receiving financial support, which is measured by the number of customers that receive one of South West Water's support tariffs.</p> <p>The support tariffs are the WaterCare Tariff and the WaterSure Tariff, however if the company introduces additional support tariffs during the period they will also be included for the purposes of this performance commitment.</p> <p>If a customer is in receipt of more than one of South West Water's support tariffs, the company should ensure that such a customer is only included/counted once for the purposes of this performance commitment.</p>
Additional detail on measurement units	NA
Specific exclusions:	None

1.2.25 Voids for residential retail

Purpose: The purpose of this PC is to incentivise the company to reduce void properties across the reporting period.

Benefits: Investigating and reducing the number of properties that do not pay for the services they receive will reduce the bills that all customers pay.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC G3
Detailed definition of performance measure	This is the number of household properties classified as void as a percentage of the total number of household properties served by the company. Void properties are defined as chargeable premises which are recorded as vacant with no charges levied.
Additional detail on measurement units	The proportion of void properties will be measured at reporting year end.
Specific exclusions	None
Reporting and assurance	No specific requirements.
Measurement unit and decimal places	Percentage household properties classed as void, reported to two decimal places.

1.2.26 Percentage of customers who find their water bill affordable

Purpose: The purpose of this PC is to incentivise the company to provide an affordable water and wastewater service for all customers.

Benefits: Achieving this PC will increase the number of customers who can afford to pay their combined water bill. Increasing the number of paying customers helps to lower bills for all customers.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PC G4
<p>Detailed definition of performance measure</p>	<p>The percentage of customers that have an affordable bill, as measured by the ratio of equivalised household income (after housing costs) to combined bill (inclusive of water and wastewater services). Equivalised income is a measure of household income that takes account of the differences in a household's size and composition, and thus is equivalised or made equivalent for all household sizes and composition.</p> <p>Households that spend more than 5% of equivalised household income after housing costs on their combined water and wastewater bill are classified as having an unaffordable bill.</p>
<p>Additional detail on measurement units</p>	<p>The formula for this performance commitment is as follows: $A = 1 - (B / C)$ Where: A: The percentage of customers that have an affordable bill B: The number of households that spend more than 5% of equivalised household income after housing costs on their combined water and wastewater bill. C: The total number of households supplied by the company.</p> <p>The required data is collected through the company's long term tracking research on affordability. The company collects total household income, housing costs, household composition and bill information from its customer base to estimate equivalised income after housing costs. Data from the company's long term tracking research is provided quarterly; this performance commitment averages the responses over the full reporting year.</p> <p>Equivalised household income is calculated following the methodology set out by the Office of National Statistics.</p> <p>This performance commitment measures affordability on the combined bill for those in the South West Water region and the water bill only in the Bournemouth Water region.</p>
<p>Specific exclusions:</p>	<p>None</p>

1.2.27 Efficient delivery of the new Knapp Mill WTW

Purpose: This performance commitment is designed to incentivise efficient delivery of the Knapp Mill water treatment works.

Benefits: Customers will be protected by the company returning expenditure if the Knapp Mill water treatment works project does not proceed or the expected date to put wholesome water into supply is delayed.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PCA6
Detailed definition of performance measure	The company is building a new water treatment works at Knapp Mill. This is subject to a special cost claim. The new water treatment works is programmed to put water into supply by 31 March 2025. In the event that the scheme does not proceed or the expected date to put wholesome water into supply is delayed, the company will return, through the ODI, 35% of the allowed costs. The remaining costs will be returned through the cost sharing mechanism.
Additional detail on measurement units	The performance level is calculated as the length of delay expressed as the number of calendar months between 31 March 2025 and the date on which the new water treatment works is expected to start putting wholesome water into supply. If the project does not proceed, the length of delay for the purpose of calculating this performance measure is deemed to be 60 months.
Specific exclusions:	None
Reporting and assurance:	At the next price review the company will submit an independent assurance report that confirms the date on which the new water treatment works is expected to start putting wholesome water into supply.
Measurement unit and decimal places	Months, to zero decimal places
Measurement timing	Reporting year
Incentive form	Revenue
Incentive type	Underperformance payments
Timing of underperformance and outperformance payments	End of period
Price control allocation	100% water network plus

Unique Reference	PR19SWB_PCA6
Frequency of reporting	Annually
Any other relevant information	The amount of underperformance payment is calculated based on the length of delay reported at the end of the 2020-25 period.

1.2.28 Efficient delivery of the new Alderney WTW

Purpose: This performance commitment is designed to incentivise efficient delivery of the Alderney water treatment works.

Benefits: Customers will be protected by the company returning expenditure if the Alderney water treatment works project does not proceed or the expected date to put wholesome water into supply is delayed.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PCA7
Detailed definition of performance measure	The company is building a new water treatment works at Alderney. This is subject to a special cost claim. The new water treatment works is programmed to put water into supply by 31 March 2027. In the event that the scheme does not proceed or the expected date to put water into supply is delayed, the company will return, through the ODI, 35% of the allowed costs. The remaining costs will be returned through the cost sharing mechanism.
Additional detail on measurement units	The performance level is calculated as the length of delay expressed as the number of calendar months between 31 March 2027 and the date on which the new water treatment works is expected to start putting wholesome water into supply. If the project does not proceed, the length of delay for the purpose of calculating this performance measure is deemed to be 36 months.
Specific exclusions:	None
Reporting and assurance:	At the next price review the company will submit an independent assurance report that confirms the date on which the new water treatment works is expected to start putting wholesome water into supply.

1.2.29 Resilient water and wastewater services on the Isles of Scilly

Purpose: This performance commitment is designed to accommodate the uncertainty concerning the timing of the extension to the company's licenced area of appointment to include the Isles of Scilly.

Benefits: If the extension to the company's licenced area of appointment to include the Isles of Scilly is not achieved by 1 April 2020, the company will return cost allowances for any period it is not operating on the Isles of Scilly.

Performance commitment definition and parameters

Unique Reference	PR19SWB_PCD5
Detailed definition of performance measure	The company is appointed and operating on the Isles of Scilly by 1 April 2020. The company's plan includes an improvement programme on the Isles of Scilly, but this is conditional on the application to have its Instrument of Appointment varied to include the Isles of Scilly being accepted.
