## Introduction from Rachel Fletcher, Chief Executive

### Improving life through water.

Water companies support all aspects of life. Safe and reliable water and wastewater services are essential for our day to day lives, our wellbeing, and our natural world.

And as the economic regulator of water and waste water in England and Wales, our role is to enable, incentivise and hold companies to account for providing the very best for customers, society and the environment now and in the future. We also oversee the markets that exist in the water sector to make sure they are working for customers.

To achieve this, we've set ourselves three goals. They are to:

- transform water companies' performance;
- drive water companies to meet long-term challenges through increased collaboration and partnerships; and
- for water companies to provide greater public value, delivering more for customers, society and the environment.

Delivering these goals will help to meet customers' needs: ensure reliable and safe water supplies today with a better environment, affordable bills and a resilient and sustainable future for water.

As we do this, we will be working to fulfil the UK and Welsh Governments' strategic priorities for Ofwat, and UK and Welsh Government policy.

We're ambitious about the future and looking for people who can help us to achieve our goals. Thanks for your interest in joining Ofwat. We look forward to receiving your application.

**Ofwat Chief Executive**

## About Ofwat and the role

Ofwat (the Water Services Regulation Authority) is the economic regulator of the water and wastewater sector in England and Wales. Our role is to help it build trust and confidence with customers, the environment and wider society. Ofwat has an ambitious new [strategy](#) and as a regulator we are setting ourselves up to achieve and equal the ambition of this new strategy. It matters to us that things on the ground really change so that our impact on customers, the environment and the future of water is tangible and meaningful.

Our work is high-profile and fast-moving, within a dynamic and agile environment. The work that you'll be involved in every day will be about helping us to deliver our strategy, helping to us to be the regulator we want to be and helping the sector to deliver outcomes that matter to customers and society. Our strategy sets out the role Ofwat will play. We will adapt, be confident, act with purpose and integrity and continuously improve so that we make the greatest contribution possible to improving life through water.

Our focus as a regulator is on regulating in a pro-market way which means establishing an effective framework that improves information (e.g. quality and visibility); improves buyers' and sellers' ability to transact (e.g. reducing 'transaction costs'); and/or by improving incentives on buyers and sellers to transact efficiently. In addition, we will look to make targeted interventions only, rather than taking a prescriptive, one-size-fits-all approach.

## Programme and Project Management (PPM) Resource Pool

Ofwat has been pursuing an ambitious business improvement programme to enable us to deliver our vision for the water and sewerage sectors. Central to the changes we have been put in place is a move to become a programme-based organisation, where resourcing is driven by programme demand and supported by matrix management.

The Programme and Project Management (PPM) Pool, and in particular the role of delivering the procurement governance function, straddles programmes across Ofwat, playing a central role in developing the strategy and delivering the vision for an agile, dynamic Ofwat enabled to support delivery of its ambitious strategy and making sure the way we handle and manage our purchase of goods and services is

aligned to the needs of our users every day. As an organisation we strive to be at the leading edge of regulation, our procurement function needs to support us in this by also being at the leading edge. Our procurements can range from £10K to c.£500k. Ofwat's annual spend is on average £5m - £6m per annum with a range of suppliers including small and medium enterprises.
