## Introduction from Rachel Fletcher, Chief Executive

### Improving life through water.

Water companies support all aspects of life. Safe and reliable water and wastewater services are essential for our day to day lives, our wellbeing, and our natural world.

And as the economic regulator of water and waste water in England and Wales, our role is to enable, incentivise and hold companies to account for providing the very best for customers, society and the environment now and in the future. We also oversee the markets that exist in the water sector to make sure they are working for customers.

To achieve this, we've set ourselves three goals. They are to:

- transform water companies' performance;
- drive water companies to meet long-term challenges through increased collaboration and partnerships; and
- for water companies to provide greater public value, delivering more for customers, society and the environment.

Delivering these goals will help to meet customers' needs: ensure reliable and safe water supplies today with a better environment, affordable bills and a resilient and sustainable future for water.

As we do this, we will be working to fulfil the UK and Welsh Governments' strategic priorities for Ofwat, and UK and Welsh Government policy.

We're ambitious about the future and looking for people who can help us to achieve our goals. Thanks for your interest in joining Ofwat. We look forward to receiving your application.

**Rachel Fletcher**  
**Ofwat Chief Executive**

## About Ofwat and the role

Ofwat (the Water Services Regulation Authority) is the economic regulator of the water and wastewater sector in England and Wales. Our role is to help it build trust and confidence with customers, the environment and wider society. Ofwat has an ambitious new [strategy](#) and as a regulator we are setting ourselves up to achieve and equal the ambition of this new strategy. It matters to us that things on the ground really change so that our impact on customers, the environment and the future of water is tangible and meaningful.

Our work is high-profile and fast-moving, within a dynamic and agile environment. The work that you'll be involved in every day will be about helping us to deliver our strategy, helping to us to be the regulator we want to be and helping the sector to deliver outcomes that matter to customers and society. Our strategy sets out the role Ofwat will play. We will adapt, be confident, act with purpose and integrity and continuously improve so that we make the greatest contribution possible to improving life through water.

## Performance & Outcomes Cluster

The performance and outcomes cluster aims to develop and implement regulatory policy, monitor company performance and drive improvement to support our strategic goals for the sector and deliver the best outcomes for customers and the environment.

## Role expectations

Resilience is crucial in the water sector – and we define this as including corporate, financial, and operational resilience. The [Financial Resilience work-stream](#), within the [Performance and Outcomes Cluster](#) looks at the corporate and financial resilience of companies in the sector.

Companies are responsible for ensuring that they are resilient and we expect companies to be transparent in their reporting in relation to the risks that they face and their assessment of financial resilience. We expect the information published by the companies we regulate to provide us with confidence as to the quality of their assessment of the long term viability.

We monitor the performance and resilience of the companies we regulate, exploring all sources of information available to us, looking in detail at corporate structures and financing and governance arrangements. We challenge companies where necessary to take steps to improve their financial resilience and we hold companies to account where they are not delivering in line with expectations.

We are also carrying out work to review our procedures and processes and to determine whether there is more we can and should do to hold companies to account for maintaining their financial resilience. Our aim is to ensure the interests of customers are protected in the event of risks to financial resilience.

In leading an area of work in the financial resilience work stream, you'll ensure that we're delivering on our strategic objectives to time and to budget, and in line with our ways of working. You will make an important contribution to understanding and managing strategic risks and opportunities.

Internally, our principals will have a seat at the leadership table, forming part of our wider leadership team, and will take responsibility for cracking our toughest problems to deliver our objectives. You will have a broad portfolio of issues, and will take ownership of a range of specific policies and procedures, taking responsibility and accountability for their success. You will be expected to have good judgement and to exercise it across complex issues responsibly in line with our strategy and ways of working.

You will be expected to provide support to colleagues across Ofwat, proactively sharing skills and knowledge, and equally will be supported by coaching and mentoring.

Effective stakeholder engagement will be important for your success, as you nurture existing relationships whilst developing new ones.

## **Key deliverables**

Successful candidates will be expected to work on different projects within the Financial Resilience work stream.

The work may involve monitoring the financial performance and position of both the wholesale water and wastewater companies and the non-household retail companies and, considering whether there is a risk to their resilience and whether action needs to be taken to protect customers.

You may also contribute to the development of our policy and processes in relation to how companies need to demonstrate resilience and the approach that Ofwat should take to regulation in this area.

Within this work stream you may also be involved in looking at issues relating to the accuracy and transparency of reporting by companies, company compliance with relevant license requirements and may be involved in work to address concerns over the resilience of individual companies

Our organisational culture is very important to us, and we expect all of our people to uphold our values of support, ambition, integrity, learning, ownership, and respect. We have a well-supported, agile and flexible working environment – and have an autonomous and trust based culture to help you succeed within Ofwat.
