Subject: Interim Supply: A consultation on process amendments

Dear Emily

Thank you for your correspondence in relation to changes to the Interim Supply Code dated 17<sup>th</sup> July 2020. We are supportive of the changes to enhance the Interim Supply Code and ensure alignment between the Interim Supply Code and the Market Codes along with improved ways of working between Ofwat and MOSL.

We would ask that in the final Interim Supply Code that Ofwat consider the broader transparency aspect for the wider market rather than those that are directly affected by any Interim Supply event. This awareness is helpful to all members operating in the market.

Should you have any further questions please do not hesitate to get in contact.

Kind regards

Alex
