

From Portsmouth Water, via email

Subject: Interim Supply: A consultation on process amendments

Dear Emily

I write further to Ofwat's recent consultation on proposed changes to the Interim Supply Code (ISC) and Wholesale Retail Code (WRC).

Portsmouth Water believe the proposed changes better align the ISC and WRC, improving consistency, transparency and clarity for trading parties. The proposed process changes build on the current processes by either improving efficiency or developing them further.

Kind regards,

Paul
