Dear Dan

Re: Interim Supply: A consultation on process amendments

We have reviewed the above consultation and support the steps that Ofwat are taking to review and update this area of the code.

Whilst this is an area that has little direct Wholesaler interaction, it is evident that Ofwat has taken the opportunity to apply lessons learnt from several Retailers exiting the market. The subsequent changes recommended to the processes that administer Interim Supply Arrangements are in our view sensible and will have a positive impact on the Non-Household Market.

We have reviewed all the questions within the consultation document and whilst not responding to them individually accept all recommended amendments.

If you have any questions or would like further clarifications, please do not hesitate to contact me.

Yours sincerely

Sean Larkin
Head of Wholesale Services
