Dear Ofwat

Response to RAPID's consultation on the regulatory and commercial framework for strategic water resource solutions

Many thanks for the opportunity to respond to the above consultation.

SES Water supports Ofwat's initiative of establishing a regulatory and commercial framework for strategic water resource solutions and believe that this groundwork is a necessary steppingstone to the future regulation of water resource solutions. While – at this time – we do not have any specific comments on the document, we are supportive of the overall direction of the consultation and will be happy to continue to work with RAPID as the framework develops and matures.

Yours faithfully

Paul Kerr
Group Chief Financial Officer
