Subject: Draft determination of Wessex Water's in-period outcome delivery incentives for 2020-21 - Wessex Water Response
Date: 21 October 2021 14:05:45

Hi Team,

We welcome the opportunity to respond to this draft determination and have no representations to raise in response to interventions you have made.

However, we do not agree with the principle applied to determining the intervention. We believe that, as detailed in our recently submitted performance commitment definition change request, the limit of 30 students to an educational advisor should be removed.

Engaging assemblies followed by further engagement with some individual classes across the school is an effective way to engage with students and reaches as many as possible. Our advisors all have extensive experience in working with children so the quality of their delivery is not diluted by the larger group size.

We will continue engaging on this matter and are not pursuing an adjustment to the draft determination at this time.

If you have any further questions please get in touch.

Kind regards,

David Peacock
