Dear Jonathan

**Consultation under section 12A of the Water Industry Act 1991 on proposed modification to Condition C**

Thank you for the consultation on removing the redundant transitional provisions in Condition C relating to infrastructure charges. Although it does not currently affect Bristol Water, we understand that it may be difficult to re-write condition C to only provide infrastructure charge limits to legacy agreements for which infrastructure charges should apply, without including other circumstances.

Therefore we agree with the conclusion that condition C can be removed from water company Licences and we have no issues with the proposal. We considered whether Appendix A which sets out Loading Units remained necessary. We consider that the Charging Rules for New Connection Services provide adequate customer protection in requiring such types of information to be included in company charging arrangements publications.

Yours sincerely,

Iain McGuffog

Director of Strategy and Regulation
