15 November 2022

Dear RAPID stakeholders

Decision to delay publication of all RAPID gate two submissions.

Gate two submissions were due for publication on 14 November, as part of the RAPID gate two assessment. These submissions are informed by, and closely linked with, water company water resource management plans (WRMPs) and regional water resources plans. Due to Defra delaying the publication of some of these plans, RAPID has instructed water companies to delay publication of their gate two submissions until appropriate supporting plans are publicly available. This is to avoid the gate two submissions being published before the plans that are informing them.

RAPID will update on publication dates as soon as possible. We will also notify stakeholders of any necessary changes to dates for stakeholder representations where needed to ensure time is maintained for stakeholders to review and respond appropriately.

Kind regards,

Paul Hickey
Managing Director – RAPID
